SUPPLEMENTARY INFORMATION:

Title: Bovine Spongiform Encephalopathy; Importation of Animals and Animal Products.

OMB Control Number: 0579–0393.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Animal Health Protection Act (7 U.S.C. 8301 *et seq.*) authorizes the Secretary of Agriculture to, among other things, prohibit or restrict the importation and interstate movement of animals and animal products into or through the United States to prevent the introduction and dissemination of animal diseases and pests.

To guard against the introduction of animal diseases, the Animal and Plant Health Inspection Service (APHIS) regulates the importation of animals and animal products into the United States. The regulations in 9 CFR parts 92, 93, 94, 95, and 96 govern the importation of certain animals, birds, poultry, meat, and other animal products and byproducts into the United States to prevent the introduction of various animal diseases, including bovine spongiform encephalopathy (BSE), a chronic degenerative disease that affects the central nervous system of cattle.

Section 92.5 of the regulations provides that all countries of the world are considered by APHIS to be in one of three BSE risk categories: Negligible risk, controlled risk, or undetermined risk. These risk categories are defined in § 92.1. Any region that is not classified by APHIS as presenting either negligible risk or controlled risk for BSE is considered to present an undetermined risk. Under the regulations, APHIS may classify a region for BSE in one of two ways. One way is for countries that have

not received a risk classification from the World Organization for Animal Health (OIE) to request classification by APHIS. The other way is for APHIS to concur with the classification given to a country by the OIE.

To ensure BSE is not introduced into the United States, the regulations place specific conditions on the importation of animals and animal products. These requirements necessitate the use of several information collection activities, including, but not limited to, certifications, official identification, request for and retention of classification as negligible or controlled risk, declarations of importation, import and export certificates, applications, import and movement permits, agreements, certification statements, seals, notifications, and recordkeeping.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.55 hours per response.

Respondents: Shippers, U.S. importers of regulated animal products, herd owners, salaried veterinarians of foreign regions, foreign exporters of processed animal protein and other regulated materials and products, accredited veterinarians, slaughter facility managers, and educators and researchers.

Estimated annual number of respondents: 2,225.

Estimated annual number of responses per respondent: 239.

Estimated annual number of responses: 532,451.

Estimated total annual burden on respondents: 292,884 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 18th day of June 2020.

Mark Davidson,

Acting Administrator, Animal and Plant Health Inspection Service.
