History and Description of the Remains

Sometime prior to 1926, human remains representing, at minimum, one individual were removed from Bonita in Morehouse Parish, LA. The human remains were donated to the Hastings Museum by Bonita resident Thomas Harp, and cataloged between 1926 and 1931 (01504). No known individual was identified. No associated funerary objects are present.

Hasting Museum records state that these human remains were excavated from the upper layer of soil and attributes them to the Choctaw. The occipital exhibits cranial remodeling, which is known to have been practiced by the Choctaw.

Sometime prior to 1926, human remains representing, at minimum, one individual were removed from a burial mound at or near Bonita, LA. According to Hasting Museum records, during the course of road construction, the human remains were discovered 10 feet below the base of the mound. (The records also state that pottery associated with the human remains was removed, but it was not given to the Hastings Museum and its whereabouts are unknown.)
