

recommendations to improve the investigation and accountability process. As part of this effort, the 2019 SAAITF report called for a “standardized survey of victim experiences, attitudes, and satisfaction.” The Sexual Violence Support and Experiences Study (SVSES) meets this requirement and will allow the DoD Sexual Assault Prevention and Response Office (SAPRO), other DoD policy offices, and the military Services to use the input of military members to inform improvements to the response system and to address challenges military members face during the military investigation and accountability process.

Title; Associated Form; and OMB Number: Sexual Violence Support and Experience Study; OMB Control Number 0704–SVSS.

Needs and Uses: Information from the SVSES will be used by the OUSD(P&R) policy offices, and the Military Departments to improve personnel policies, programs, practices, and trainings related to sexual assault response and accountability systems in the military. It will provide the policy offices of the OUSD(P&R) with current data on (1) Service member satisfaction with sexual assault support resources; (2) the impact that the military support and justice processes have on Services members who experience sexual assault during military service (e.g., their psychological health and well-being); and (3) aspects of the military support and justice process that relate to retention intention, career progression, and separation from military service.

Any Service member (Active or Reserve component) who has experienced sexual assault since joining the military will be eligible to participate in the study. Recruitment for the SVSES will include proactive outreach to Service members who previously filed an unrestricted report for sexual assault and Service members who requested to learn more about the study. The Office of People Analytics (OPA) will administer the SVSES via the web. The survey will be administered online via proprietary software developed by OPA’s operations contractor. To reduce respondent burden, these online surveys will use “smart skip” technology to ensure respondents only answer questions that are applicable to them.

The study will not produce generalizable statistics or findings; rather, it will inform policy and program offices within the DoD about Service member satisfaction with sexual assault response resources and processes and the sexual assault

accountability system. OPA will provide interim reports regarding the findings of the study to OUSD(P&R) policy offices on a biannual basis and a full report on a biennial basis. Data from the SVSES will also be used in future analyses.
