SUPPLEMENTARY INFORMATION:

I. Background

The Department is requesting approval for a generic Solicitation for

Grant Application (SGA) form for information collection requirements for SGAs that extend beyond what is collected on currently approved standard forms. OMB approval of this generic SGA form will assist the Department to carry out its responsibilities under the Paperwork Reduction Act by accurately accounting for the public burden associated with grant applications through the promotion of a common structure for reporting the information collection requirements contained in DOL's SGAs.

Periodically, the Department of Labor (DOL or the Department) solicits applications for grants through issuing a "Solicitation for Grant Applications" or "SGA." To ensure that grants are awarded to the applicant best suited to perform the functions of the grant, applicants are generally required to submit a two-part application. The first part of DOL's grant applications consists of submitting the Standard Form 424 (SF-424), "Application for Federal Assistance." The second part of a grant application usually requires a technical proposal demonstrating the applicant's capabilities in accordance with a statement of work and/or selection criteria.

The information collected in response to solicitations for grant applications has been and will be used by the Department of Labor for awarding grants to the applicants most suited for fulfilling the mission of the grant.

II. Review Focus

The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
