II. Did EPA Approve the Application?

The Agency approved the application after considering all required data on risks associated with the proposed use of n-tetradecyl acetate, and information on social, economic, and environmental benefits to be derived from use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of n-tetradecyl acetate when used in accordance with widespread and commonly recognized practice, will not generally cause unreasonable adverse effects to the environment.

III. Approved Application

EPA issued a notice, published in the **Federal Register** of August 27, 2008 (73 FR 50613-50614) (FRL-8373-8), which announced that BASF Corporation, P.O. Box 13528, Research Triangle Park, NC, 27709, had submitted an application to register the pesticide product, n-Tetradecyl Acetate Technical Pheromone, Straight Chain Lepidopteran Pheromone (EPA File Symbol 7969-EIE), containing n-tetradecyl acetate at 99.56%. This product was not previously registered.

The application was approved on December 4, 2008, as n-Tetradecyl Acetate Technical Pheromone (EPA Registration Number 7969-282 for manufacturing use. (A. Bryceland).

agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. B. What Should I Consider as I Prepare My Comments for EPA?

1. **Submitting CBI.** Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for preparing your comments.** When submitting comments, remember to:

II. Background

A. What Action is the Agency Taking?

EPA requests public comment during the next 60 days on a petition (available under docket ID number EPA-HQ-OPP-2008-0877) received from the NRDC requesting that the Agency revoke all tolerances (maximum legal residue limits) and cancel all registrations for the pesticide 2,4-D. The petitioner, NRDC, claims that EPA cannot make a finding that there is a reasonable certainty of no harm from dietary residues of 2,4-D and, therefore, that the Agency must revoke all tolerances established under section 408 of FFDCA, as amended by FQPA.

As a part of the petition, NRDC claims that the Agency did not consider the full spectrum of potential human health effects associated with 2,4-D in connection with EPA's reassessment of the existing 2,4-D tolerances, and EPA's environmental risk assessment including:

1. Information on the endocrine disrupting effects of 2,4-D.
2. Information on the neurotoxicity related to 2,4-D exposure.
3. Information that products containing 2,4-D are mutagenic.
4. Data showing that dermal absorption of 2,4-D is enhanced by alcohol consumption, sunscreen, and DEET which the EPA's exposure assessment failed to include.
5. Information about adverse developmental effects at doses below those included in EPA's risk assessment for exposure of infants to 2,4-D in breast milk.

EPA's risk assessment of 2,4-D and findings on whether the tolerances for 2,4-D comply with the safety standard in FFDCA section 408, as amended by FQPA, are contained in the Reregistration Eligibility Decision (RED) document for 2,4-D which is available on EPA's pesticide webpage at <http://www.epa.gov/pesticides/reregistration/status.htm>. Docket materials for this pesticide are available in the electronic docket at <http://www.regulations.gov>; risk assessment and related documents for this pesticide can be found under docket ID number EPA-HQ-OPP-2004-0167.

B. What is the Agency's Authority for Taking this Action?

This action is taken under the authority of FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3).

Registration review dockets contain information that will assist the public in understanding the types of information and issues that the Agency may consider during the course of registration reviews. Through this program, EPA is ensuring that each pesticide's registration is based on current scientific and other knowledge, including its effects on human health and the environment. This document also announces the Agency's intent not to open a registration review docket for *Ampelomyces quisqualis* and for *Candia oleophila*. These pesticides do not currently have any actively registered pesticide products and are not, therefore, scheduled for review under the registration review program.
