Animal and Plant Health Inspection Service

Title: Plum Pox Compensation
OMB Control Number: 0579–0159

Summary of Collection: Under the Plant Protection Act (7 U.S.C. 7701 *et seq.*), the Secretary of Agriculture is authorized to prohibit or restrict the importation, entry, or movement of plants and plant pests to prevent the introduction of plant pests into the United States or their dissemination within the United States. The regulations in 7 CFR 301.74–5 permit owners of commercial stone fruit orchards and owners of fruit tree nurseries to receive compensation under certain circumstances. Owners of commercial stone fruit orchards may receive compensation for losses associated with trees destroyed to control plum pox pursuant to an emergency action notification (EAN) issued by the Animal & Plant Health Inspection Service (APHIS). Owners of fruit tree nurseries may receive compensation for net revenue losses associated with movement or sale of nursery stock prohibited under an EAN issued by APHIS with respect to regulated articles within the nursery in order to control plum pox. Plum Pox is an extremely serious viral disease of plants that can affect many stone fruit species, including plum, peach, apricot, almond, and nectarine. APHIS will collect information using form PPQ 651 Application for Plum Pox Compensation and PPQ 523 Emergency Action Notification.

Need and Use of the Information: APHIS will collect the owner's name and address, a description of the owner's property, and a certification statement that the trees removed from the owner's property were stone fruit trees from commercial fruit orchards or fruit tree nurseries. For claims made by owners of stone fruit orchards, the completed application must be accompanied by a copy of the EAN ordering the destruction of their trees, the notification's accompanying inventory describing the acreage and ages of trees removed and documentation verifying that the destruction of the trees have been completed and the date of that completion. For claims made by owners of fruit tree nurseries, the completed application must be accompanied by a copy of the EAN prohibiting the same or movement of the nursery stock, the notification's accompanying inventory describing the total number of trees covered by the EAN, their age and variety, and documentation indicating the final disposition of the nursery stock. Without the information APHIS would be unable to compensate eligible grove and nursery owners for their losses.

Description of Respondents: Farms; Business or other for-profit.

Number of Respondents: 2,512.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 89.

Animal and Plant Health Inspection Service

Title: Interstate Movement of Fruit from Hawaii

OMB Control Number: 0579–0331

Summary of Collection: Under the Plant Protection Act (7 U.S.C. 7701 *et seq.*), the Secretary of Agriculture is authorized to prohibit or restrict the importation, entry, or movement of plants and plant pests to prevent the introduction of plant pests into the United States or their dissemination within the United States. The Hawaii fruit and vegetables regulations contained in 7 CFR 318.13–1 through 318.13–25 govern, among other things, the interstate movement of fruits and vegetables from Hawaii. These regulations are necessary to prevent the spread of plant diseases and pest that occur in Hawaii but not on the mainland United States. The Animal and Plant Health Inspection Service (APHIS) regulations allow mangosteen, dragon fruit, melon, pods of cowpea and its relatives, breadfruit, jackfruit, and fresh drumstick tree pods to be moved interstate from Hawaii under certain conditions to the mainland United States while continuing to provide protection against the spread of plant pests from Hawaii in the continental United States.

Need and Use of the Information: APHIS will collect information using PPQ 530 and 540 forms to prevent the interstate spread of a number of destructive and economically damaging agricultural pests. If APHIS did not collect this information the effectiveness of APHIS' Hawaiian fruits and vegetables quarantine program would be severely compromised and could result in millions of dollars in damage to American agriculture.

Description of Respondents: Business or other for-profit.

Number of Respondents: 110.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 545.
