Forest Service

Title: Forest Industries Data Collection System.

OMB Control Number: 0596–0010.

Summary of Collection: The Forest and Range Renewable Resources Planning Act of 1974 (Pub. L. 93–278), National Forest Management Act of 1976 (16 U.S.C. 1600), and the Forest and Rangeland Renewable Resources Research Act of 1978 (Pub. L. 95–307) amended by the Energy Security Act of 1980 (42 U.S.C. 8701) require the Forest Service (FS) to evaluate trends in the use of logs and wood chips, to forecast anticipated levels of logs and wood chips, and to analyze changes in the harvest of the resources. Forest product and other wood-using industries are important to state, regional, and national economies. In most southern states, the value of rounded timber products is ranked either first or second in relation to other major agricultural crops. The importance and value of the timber products industry is significant in other regions of the United States as well. The FS will collect information using questionnaires.

Need and Use of the Information: To monitor the types, species, volumes, sources, and prices of the timber products harvested throughout the Nation. Using the “Primary Mill Questionnaire” FS will collect industrial round wood information from the primary wood-using industries throughout the United States and from mills in Canada that directly receive wood from the United States. FS will also use the “Pulp & Board Forest Industries Questionnaire.” The data will be used to develop specific economic development plans for a new forest-related industry in a State and to assist existing industries in identifying raw material problems and opportunities. If the information were not collected, data would not be available for sub-state, state, regional and national policy makers and program developers to make decisions related to the forestland on a scientific basis.
