## DEPARTMENT OF ENERGY

### Surplus Plutonium Disposition Program

**AGENCY:** National Nuclear Security Administration, Department of Energy.

**ACTION:** Amended record of decision.

**SUMMARY:** The U.S. Department of Energy/National Nuclear Security Administration (DOE/NNSA) is amending the Record of Decision (ROD) for the *Surplus Plutonium Disposition Environmental Impact Statement* (SPD EIS) to allow for the disposition of up to 34 metric tons (MT) of surplus weapons-grade plutonium as mixed oxide (MOX) fuel to be irradiated in commercial nuclear reactors. The ROD for the SPD EIS indicated that DOE would dispose of up to 50 MT of weapons-usable surplus plutonium by making MOX fuel from 33 MT and immobilizing the remaining 17 MT. However, on April 19, 2002, DOE/NNSA amended that ROD to cancel the immobilization portion of the surplus plutonium disposition program due to budgetary constraints. DOE/NNSA also noted in the April 19, 2002 ROD that in response to a statutory directive, it had submitted to Congress a report on a strategy for the disposal of surplus plutonium currently located at, or to be shipped to the Savannah River Site (SRS). That strategy involved converting this plutonium to MOX fuel and irradiating it in commercial power reactors. DOE/NNSA stated in the April 19, 2002 ROD that it was evaluating the changes to the MOX fuel portion of the surplus plutonium disposition program that would be entailed by such a MOX-only strategy, including the need for

additional environmental reviews pursuant to the National Environmental Policy Act (NEPA), and that it would make no final decisions regarding the MOX portion of the program until these reviews were completed.

In accordance with the April 19, 2002 amended ROD, DOE/NNSA has now evaluated the changes to the MOX fuel portion of the program that would be entailed by pursuit of such a MOX-only disposition strategy and the impacts of those changes. This evaluation is presented in a Supplement Analysis (SA) prepared pursuant to DOE procedures implementing NEPA (10 CFR 1021.314), Supplement Analysis for Changes Needed to the Surplus Plutonium Disposition Program (DOE/EIS-0283-SA1). It concludes that the potential environmental impacts of the changes in the MOX program are not significantly different from the impacts analyzed in the SPD EIS. Therefore, DOE/NNSA will now pursue a MOX-only surplus plutonium disposition program. The program will dispose of 34 MT of surplus plutonium, including approximately 6.5 MT of the 17 MT of surplus plutonium originally intended for immobilization.

**FOR FURTHER INFORMATION CONTACT:** For further information concerning the disposition of surplus plutonium, copy of the Supplement Analysis for Changes Needed to the Surplus Plutonium Disposition Program or this amended ROD, contact Hitesh Nigam, Deputy NEPA Compliance Officer, Office of Fissile Materials Disposition, National Nuclear Security Administration, 1000 Independence Avenue, SW., Washington, DC 20585, or leave a message at 800-820-5134.

For further information concerning DOE's NEPA process, contact Ms. Carol Borgstrom, Director, Office of NEPA Policy and Compliance (EH-42), U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone (202) 586-4600, or leave a message at (800) 472-2756. Additional information regarding the DOE NEPA process and activities is also available on the Internet through the NEPA home page at <http://tis.eh.doe.gov/nepa>.

#### SUPPLEMENTARY INFORMATION:

##### I. Background

On April 19, 2002, DOE/NNSA issued an amended ROD (67 FR 19432) for the Surplus Plutonium Disposition Environmental Impact Statement (SPD EIS) (DOE/EIS-0283, November 1999) and the Storage and Disposition of Weapons-Usable Fissile Materials Final Programmatic Environmental Impact
