SUPPLEMENTARY INFORMATION:

Title: National Emissions Standards for Hazardous Air Pollutants from Petroleum Refineries, 40 CFR part 63, subpart CC; OMB Control Number 2060-0340; EPA ICR Number 1692.04, expiring August 31, 2001. This is an extension of a currently approved collection.

Abstract: The information being requested includes a one-time report of construction, anticipated and actual

start-up dates, and physical or operational changes to existing facilities; notification of compliance status reports; periodic reports; and event triggered (e.g., notification of installation of a new control device or reconstruction of an existing control device, notification of an intent to perform a performance test) reports. The periodic reports provide information on monitored control device parameters when they are outside of established ranges and on instances where inspections revealed problems. Records (e.g., parameter monitoring data, records of annual storage vessel inspections) are required to be maintained on-site for a minimum of 5 years.

Effective enforcement of the standards is necessary due to the hazardous nature of benzene (a known human carcinogen) and the other Hazardous Air Pollutants (HAP's) emitted from petroleum refineries. The required records and reports are necessary: (1) To enable EPA to identify new and existing sources subject to the standards, and (2) to assist EPA and State agencies to which enforcement has been delegated in determining compliance with the standards. The EPA uses the reports to identify facilities that may not be in compliance with the standards. Based on reported information, EPA can decide which facilities should be inspected and what records or specific emission sources should be inspected at each facility. The required records also provide an indication as to whether facility personnel are operating and maintaining control equipment properly.

In order to retain effective enforcement of the petroleum refinery NESHAP (sections 112 and 114 of the Clean Air Act) response to this information collection is mandatory. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on September 15, 2000, (65 FR 55955); no comment were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 1495 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the

time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Owners and operators of petroleum refineries.

Estimated Number of Respondents: 157.

Frequency of Response: Semi-annually.

Estimated Total Annual Hour Burden: 469,430 hours.

Estimated Total Annualized Capital and Operating & Maintenance Cost Burden: \$542,173.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1692.05 and OMB Control No. 2060-0340 in any correspondence.

Title: Annual Updates of Emission Data to Aerometric Information Retrieval System (OMB Control No. 2060-0088; EPA ICR No. 916.11) expiring August 31, 2001. This is a request for extension of a currently approved collection.

Abstract: This ICR deals with reports required by 40 CFR 51.321, 51.322, and 51.323. The respondents (States) are required to annually update information on stationary sources emitting at least prescribed amounts of pollutants regulated by National Ambient Air Quality Standards (NAAQS) via electronic input to EPA. EPA's Office of Air Quality Planning and Standards (OAQPS) uses the annual emission reports to update a national data base on air emissions which it has maintained since 1974. The data is used in developing emission standards, applying dispersion models, preparing national trend assessments, preparing reports to Congress, providing information to the public, and other special analyses and reports. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR

part 9 and 48 CFR chapter 15. The Federal Register document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on June 13, 2001 (66 FR 31913); no comments were received.
