SUPPLEMENTARY INFORMATION:

Title: Associated Form; and OMB Number: TRICARE Inpatient Satisfaction Survey (TRISS); OMB Control Number: 0720-TRSS.

Needs and Uses: The DHA administers the TRICARE TRISS survey to understand perceptions of inpatient care among Military Health System (MHS) users. The survey instrument adheres to the methodological and analytical protocols and questionnaire items mandated by the industry standard Hospital Consumer Assessment of Healthcare Providers and Systems protocol. Developed by the Centers for Medicare and Medicaid Services and the Agency for Healthcare Research and Quality, the program provides valid and reliable self-reported experience ratings of inpatient experiences.

As a result, the TRISS program allows objective and meaningful comparisons between hospitals, in areas that are important to consumers. Results are published online, and the public can view them at <https://www.medicare.gov/>

care-compare/. But perhaps most significantly, the comparative scores and findings can be used by MHS leadership to improve care as well as by beneficiaries to make informed choices. TRISS is designed to provide actionable performance feedback to improve overall quality of health care. The main goals of the TRISS are to:

- Provide comparable data on the patient's perspective on care that allows objective and meaningful comparisons between hospitals on domains that are important to beneficiaries.

- Establish a uniform measure of user satisfaction with received healthcare services.

- Public reporting of the survey results is designed to create incentives for Military Treatment Facilities (MTFs) to improve their quality of care.

The study population consists of military personnel, their family members, and eligible retirees and their family members with a recent overnight hospitalization. The survey is administered to patients after a recent discharge from either a MTF or a civilian hospital to gather information about their experience of the care they received. Data are reported quarterly to track trends over time.

Affected Public: Individuals or households.

Annual Burden Hours: 12,720.

Number of Respondents: 63,600.

Responses per Respondent: 1.

Annual Responses: 63,600.

Average Burden per Response: 12 minutes.

Frequency: On occasion.

Dated: November 14, 2023.
