Transportation Security Administration (TSA)

Title: Customer Comment Card.

Type of Request: Extension of a currently approved collection.

OMB Control Number: 1652-0030.

Form(s): TSA Customer Comment Card.

Affected Public: Airport passengers.

Abstract: This information collection established a voluntary program for airport passengers to provide feedback to TSA regarding their experiences with TSA security procedures. The collection allows TSA to determine and respond to customer concerns about security procedures and policies. TSA intends to continue to make available to airports a Customer Comment Card, which will collect feedback and, if the passenger desires, contact information so that TSA staff can respond to the passenger's comment. For passengers who deposit their cards in the designated drop-boxes, TSA airport staff will collect the cards, categorize comments, enter the results into an online system for reporting, and respond to passengers as necessary. Passengers also have the option to mail the cards directly to TSA. TSA also will continue to provide the TSA Contact Center for passengers to make comments independently of airport involvement. The TSA is requesting an extension so that it can continue to immediately collect and respond in a timely manner to comprehensive feedback, which serves as critical input when the TSA must modify its screening procedures.

Number of Respondents: 1,783,800.

Estimated Annual Burden Hours: An estimated 150,880 hours.

TSA is soliciting comments to—

(1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Issued in Arlington, Virginia, on May 12, 2005.
