

pest. The data sheets include references to the scientific evidence we used in making these determinations.

A complete list of the taxa of plants for planting that we have determined to be quarantine pests or hosts of quarantine pests, along with the data sheets supporting those determinations, may be viewed on the Regulations.gov Web site or in our reading room (see **ADDRESSES** above for a link to *Regulations.gov* and information on the location and hours of the reading room). You may request paper copies of the list and data sheets by calling or writing to the person listed under **FOR FURTHER INFORMATION CONTACT**.

For taxa of plants for planting that are hosts of quarantine pests, the data sheets specify the countries from which the taxa's importation would not be authorized pending pest risk analysis. In most cases, the importation of the taxa would not be allowed from any country. In some cases, the taxa would be allowed to be imported from Canada. We would allow such importation when Canada is free of the quarantine pest for which the taxa are hosts and when Canada's import regulations and our restrictions specific to Canada ensure that the pest would not be introduced

into the United States through the importation of the taxa from Canada.

In a few cases, the taxa would be allowed to be imported from countries that are currently exporting the taxa to the United States, subject to restrictions in a Federal Order that was issued previously. We would continue to allow such importation based on our experience with importing those taxa of plants for planting and our findings, through inspection, that they are generally pest free, and based on our determination that the restrictions in the Federal Order are sufficient to mitigate the risk associated with the quarantine pest in question.

After reviewing any comments we receive, we will announce our decision regarding the addition of the taxa described in the data sheets to the NAPPRA lists in a subsequent notice. If the Administrator's determination that the taxa are quarantine pests or hosts of quarantine pests remains unchanged following our consideration of the comments, then we will add the taxa described in the data sheets to the appropriate NAPPRA list.
