The Developmental Disabilities
Assistance and Bill of Rights Act of
2000 (DD Act of 2000) directs the
Secretary of Health and Human Services

to develop and implement a system of
program accountability to monitor the
grantees funded under the DD Act of
2000. The program accountability
system shall include the National
Network of University Centers for
Excellence in Developmental
Disabilities (UCEDD) Education,
Research, and Service.

The DD Act of 2000 states that the
UCEDD Annual Report should contain
information on progress made in
achieving the projected goals of the
Center for the previous year.

Reporting on the extent to which the
goals were achieved; a description of the
strategies that contributed to achieving
the goals; the extent to which the goals
were not achieved, a description of
factors that impeded the achievement;
and an accounting of the manner in
which funds paid to the Center under
this subtitle for a fiscal year were
expended. Information on proposed
revisions to the goals and a description
of successful efforts to leverage funds,
other than funds made available under
the DD Act of 2000.

In addition, the DD Act of 2000 states
those grantees must also report on data
collected regarding:

(1) Consumer satisfaction with the
advocacy;
(2) capacity building;
(3) systemic change activities initiated
by the UCEDD;

(4) the extent to which the UCEDD's
advocacy, capacity building, and
systemic change activities provided
results through improvements; and
(5) the extent to which collaboration
was achieved in the areas of advocacy,
capacity building, and systemic change.

UCEDD is a discretionary grant
program that supports States the
operation and administration of a
national network of UCEDDs in the
States. UCEDDs are interdisciplinary
education, research, and public service
units of universities, public or not-for-
profit entities associated with
universities that engage in core
functions. For example, provision of
interdisciplinary pre-service preparation
and continuing education of students
and fellows; provision of community
services, including training or technical
assistance; conduct of research; and
dissemination of information.

Addressing, directly or indirectly one
or more of the areas of emphasis such
as, quality assurance, education and
early intervention, child care, health,
employment, housing, transportation,
recreation, and other services available
or offered to individuals in a
community, including formal and
informal community supports, that
affect their quality of life.

Currently, UCEDDs engage in four broad tasks: Conducting interdisciplinary training, promoting exemplary community service programs and providing technical assistance at all levels from local service delivery to community and state governments, conducting research, and disseminating information to the field.

UCEDD accomplishments include:

- Directing exemplary training programs. The provision of training is offered in an interdisciplinary format where faculty and trainees represent a variety of disciplines, such as pediatrics, education, psychology, and

nursing thereby expanding opportunities for students to learn about the differing perspectives of various professionals providing services to individuals with developmental disabilities and their families.

- Providing community services and technical assistance. Staff offer expertise through training and technical assistance activities to individuals with developmental disabilities, family members of these individuals, professionals, paraprofessionals, students, systems, support service organizations, volunteers, among others.

- Contributing to the development of new knowledge through research and information dissemination. UCEDDs develop and field test models of service delivery and evaluate existing innovative practices, which are then disseminated to the field to translate research into practice.

The proposed data collection tools may be found on the ACL website for review at <https://www.acl.gov/about-acl/public-input>.

Estimated Program Burden: ACL estimates the burden associated with this collection of information as follows:

Respondent/data collection activity	Number of respondents	Responses per respondent	Hours per response	Annual burden hours
Total	67	1	143	9,581

Dated: February 25, 2020.
