(2) The intermediary must allow the Agency or its representative to review the operations and financial condition of the intermediary upon the Agency's request. The intermediary and its agents must provide access to all pertinent information to allow the Agency, or any party authorized by the Agency, to conduct such reviews. The intermediary must submit financial or other information within 14 calendar days upon receipt of the Agency's request, unless the data requested is not available within that time frame. Failure to supply the requested information to the satisfaction of the Agency will constitute non-monetary default. The Agency may conduct reviews, including on-site reviews, of the intermediary's operations and the operations of any agent of the intermediary, for the purpose of verifying compliance with Agency regulations and guidelines. These reviews may include, but are not limited to, audits of case files; interviews with owners, managers, and staff; audits of collateral; and inspections of the intermediary's and its agents underwriting, servicing, and liquidation guidelines.

(g) *Annual monitoring reports.* Each intermediary will be monitored by the Agency through annual monitoring reports submitted by the intermediary. Annual monitoring reports must include a description of the use of loan funds, information regarding the acreage, the number of heirs both before and after loan was made, audit findings, disbursement transactions, and any other information required by the Agency, as necessary.

(h) *Unused loan funds.* If any part of the HPRP loan has not been used in accordance with the intermediary's relending plan within 3 years from the date of the HPRP loan agreement, the Agency may cancel the approval of any funds not delivered to the intermediary. The Agency may also direct the intermediary to return any funds delivered to the intermediary that have not been used by that intermediary in accordance with the intermediary's relending plan. The Agency may, at its sole discretion, allow the intermediary additional time to use the HPRP loan funds.

§ 769.165 Loan servicing.

(a) *Payments.* The intermediary will make payments to the Agency as specified in the HPRP loan documents. All payments will be applied to interest first, any additional amount will be applied to principal.

(b) *Restructuring.* The Agency may restructure the intermediary's loan debt, if:

(1) The loan objectives cannot be met unless the HPRP loan is restructured;

(2) The Agency's interest will be protected; and

(3) The restructuring will be within the Agency's budget authority.

(c) *Default.* The Agency will work with the intermediary to correct any default, subject to the requirements of paragraph (b) of this section. In the event of monetary or non-monetary default, the Agency will take all appropriate actions to protect its interest, including, but not limited to, declaring the debt fully due and payable and may proceed to enforce its rights under the HPRP loan agreement, and any other loan instruments relating to the loan under applicable law and regulations, and commencement of legal action to protect the Agency's interest. Violation of any agreement with the Agency or failure to comply with reporting or other HPRP requirements will be considered non-monetary default.

§ 769.166 Transfers and assumptions.

(a) All transfers and assumptions must be approved in advance by the Agency. The assuming entity must meet all eligibility criteria for HPRP.

(b) Available transfer and assumption options to eligible intermediaries include:

(1) The total indebtedness may be transferred to another eligible intermediary on the same rates and terms; or

(2) The total indebtedness may be transferred to another eligible intermediary on different terms not to exceed the term for which an initial loan can be made.

(c) The transferor must prepare the transfer document for the Agency's review prior to the transfer and assumption.

(d) The transferee must provide the Agency with information required in the application as specified in § 769.158.

(e) The Agency's approved form of the assumption agreement will formally authorize the transfer and assumption and will contain the Agency case number of the transferor and transferee.

(f) When the transferee makes a cash down-payment in connection with the transfer and assumption, any proceeds received by the transferor will be credited on the transferor's loan debt in order of maturity date.

§ 769.167 Appeals.

Any appealable adverse decision made by the Agency may be appealed

upon written request of the intermediary as specified in 7 CFR part 11.

§ 769.168 Exceptions.

The Agency may grant an exception to any of the requirements of this subpart if the proposed change is in the best financial interest of the Government and not inconsistent with the authorizing law or any other applicable law.

III. Rulemaking Procedure

Under section 553(b) of the Administrative Procedure Act (5 U.S.C. 553(b)), an agency may waive publication in the **Federal Register** of a notice of proposed rulemaking and opportunity for comment requirements if it finds, for good cause, that it is impracticable, unnecessary, or contrary to the public interest. As authorized by 5 U.S.C. 553(b)(3)(B), the NRC finds good cause to waive notice and opportunity for comment on these amendments, because notice and opportunity for comment is unnecessary. The amendments will have no substantive impact and are of a minor and administrative nature dealing with corrections to certain CFR sections or are related only to management, organization, procedure, and practice. Specifically, the revisions correct mailing addresses, typographical errors, grammatical errors, references,

spelling, agency names, and office titles; remove outdated reporting requirements; clarify language; add metric units; and insert missing language. The Commission is exercising its authority under 5 U.S.C.553(b) to publish these amendments as a final rule. The amendments are effective September 8, 2021. These amendments do not require action by any person or entity regulated by the NRC and do not change the substantive responsibilities of any person or entity regulated by the NRC.

IV. Environmental Impact: Categorical Exclusion

The NRC has determined that this final rule is the type of action described in § 51.22(c)(2), which categorically excludes from environmental review rules that are corrective or of a minor, nonpolicy nature and do not substantially modify existing regulations. Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this rule.

V. Paperwork Reduction Act

This final rule does not contain a collection of information as defined in the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) and, therefore, is not subject to the requirements of the Paperwork Reduction Act of 1995.

VI. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, and well-organized manner. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, “Plain Language in Government Writing,” published June 10, 1998 (63 FR 31885).

VII. Backfitting and Issue Finality

The NRC has determined that the corrections in this final rule would not constitute backfitting as defined in § 50.109, “Backfitting,” and as described in NRC Management Directive (MD) 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests.” It also would not constitute

forward fitting as that term is defined and described in MD 8.4 or affect the issue finality of any approval issued under 10 CFR part 52. The amendments are non-substantive in nature, including correcting mailing addresses, typographical errors, grammatical errors, references, spelling, agency names, and office titles; removing outdated reporting requirements; clarifying language; adding metric units; and inserting missing language. They impose no new requirements and make no substantive changes to the regulations. The corrections do not involve any provisions that would impose backfits as defined in 10 CFR chapter I, or that would be inconsistent with the issue finality provisions in 10 CFR part 52. For these reasons, the issuance of this final rule would not constitute backfitting or be inconsistent with any of the issue finality provisions in 10 CFR part 52. Therefore, the NRC has not prepared any additional documentation for this correction rulemaking addressing backfitting or issue finality.

VIII. Congressional Review Act

This final rule is not a rule as defined in the Congressional Review Act (5 U.S.C. 801–808).

IX. Agreement State Compatibility

Under the “Agreement State Program Policy Statement” approved by the Commission on October 2, 2017, and published in the **Federal Register** on October 18, 2017 (82 FR 48535), NRC program elements (including regulations) are placed into compatibility categories A, B, C, D, NRC, or adequacy category Health and Safety (H&S). Compatibility Category A program elements are those program elements that are basic radiation protection standards and scientific terms and definitions that are necessary to understand radiation protection concepts. An Agreement State should adopt Category A program elements in an essentially identical manner in order to provide uniformity in the regulation of agreement material on a nationwide basis. Compatibility Category B program

elements are those program elements that apply to activities that have direct and significant effects in multiple jurisdictions. An Agreement State should adopt Category B program elements in an essentially identical manner. Compatibility Category C program elements are those program elements that do not meet the criteria of Category A or B, but contain the essential objectives that an Agreement State should adopt to avoid conflict, duplication, gaps, or other conditions that would jeopardize an orderly pattern in the regulation of agreement material on a national basis. An Agreement State should adopt the essential objectives of the Category C program elements. Compatibility Category D program elements are those program elements that do not meet any of the criteria of Category A, B, or C and, therefore, do not need to be adopted by Agreement States for purposes of compatibility. Compatibility Category NRC program elements are those program elements that address areas of regulation that cannot be relinquished to the Agreement States under the Atomic Energy Act of 1954, as amended, or provisions of 10 CFR. These program elements should not be adopted by the Agreement States. Adequacy category H&S program elements are program elements that are required because of a particular health and safety role in the regulation of agreement material within the State and should be adopted in a manner that embodies the essential objectives of the NRC program.

The portions of this final rule that amend 10 CFR parts 32, 37, and 70 are a matter of compatibility between the NRC and the Agreement States, thereby providing consistency among Agreement State and NRC requirements, and are listed in the following table. The changes to 10 CFR parts 2, 11, 25, 50, 52, 55, 72, 73, 95, and 110 and appendix A to 10 CFR part 25, appendix E to 10 CFR part 50, and appendices E and F to 10 CFR part 52 categories are not subject to Agreement State jurisdiction and consequently are not required for compatibility.

RIN 2120-AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all The Boeing Company Model 737-8, 737-9, and 737-8200 (737 MAX) airplanes; and certain Model 737-800 and 737-900ER series airplanes. This AD was prompted by the determination that the aft cargo compartment fire suppression capability is reduced if the airplane is dispatched or released with failed electronic flow control of air conditioning packs, as is currently allowed by these airplane models’ master minimum equipment lists (MMEs). This AD prohibits the carriage of cargo in the aft cargo compartment when the airplane is dispatched or released with failed

electronic flow control of air conditioning packs. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective August 9, 2021.

The FAA must receive comments on this AD by September 23, 2021.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <https://www.regulations.gov>. Follow the instructions for submitting comments.

- *Fax:* 202-493-2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket at <https://www.regulations.gov> by searching for and locating Docket No. FAA-2021-0614; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The street address for Docket Operations is listed above.

SUPPLEMENTARY INFORMATION:

Background

The FAA was notified by Boeing in March 2021 of a potential concern that the aft cargo compartment fire suppression capability is reduced on affected airplanes if the airplane is dispatched or released with failed electronic flow control of air conditioning packs, as is currently allowed by the existing FAA-approved MMEL of the affected airplane models. This MMEL allowance can result in the inability to contain a fire in the aft cargo compartment due to increased air leakage that degrades the fire suppression performance. A failed electronic flow control of air conditioning packs would significantly increase the pack airflow and cargo compartment air leakage. In April 2021, Boeing advised the FAA that such increased leakage could result in

insufficient concentration of Halon fire suppressant in the aft cargo compartment, which can result in the inability to contain a fire for the time necessary to divert to a suitable airport.

The FAA is issuing this AD to address failed electronic flow control of air conditioning packs, which can result in an uncontained aft cargo compartment fire due to insufficient cargo fire suppression capability. The FAA is issuing this AD to address the unsafe condition on these products.

FAA’s Determination

The FAA is issuing this AD because the agency has determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

AD Requirements

This AD prohibits dispatch or release of an airplane with cargo in the aft cargo compartment with failed electronic flow control of air conditioning packs. The AD specifically allows non-combustible and/or non-flammable empty cargo handling equipment, ballast, and/or fly-away kits in the aft cargo compartment.

MMEL Revisions

This AD refers to items in ATA System No. 21, Air Conditioning, of Boeing 737 (B-737-100/200/300/400/500/600/700/800/900/900ER) MMEL, Revision 61, dated July 8, 2020; and Boeing 737 MAX (B-737-8/-8200/-9) MMEL, Revision 3, dated April 12, 2021;¹ those items may also be included in an operator’s FAA-approved minimum equipment list (MEL). This AD prohibits dispatch or release of the airplane under conditions currently allowed by those items in the MMEL. The FAA plans to revise the MMELs to modify those items; operators would then be required to also revise their applicable existing FAA-approved MEL accordingly.

Justification for Immediate Adoption and Determination of the Effective Date

Section 553(b)(3)(B) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) authorizes agencies to dispense with notice and comment procedures for rules when the agency, for “good cause,” finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” Under this section, an agency, upon finding good cause, may issue a
