

ones affected by the merger.⁶ Most of the bases for imposing out-of-market remedies are not met here—for example, if “the relevant market alleged is already concentrated or has seen significant consolidation in the previous ten years” (emphasis added).⁷ The Complaint does not allege that the three relevant geographic markets here have seen significant consolidation.

The Chair also justifies the broad prior approval provision because JAB previously acquired clinics and entered into a related consent order. In that prior matter, JAB approached the Commission with a proposed acquisition and worked with it to resolve competitive overlaps, small parts of a much larger transaction.⁸ That process enabled the FTC to ensure that overlapping assets were divested to an acceptable buyer, which is critical to maintaining competition.⁹ The effect of imposing broader prior approval requirements because of such settlements will be to deter not mergers, but settlements. It will deter parties from submitting for agency review the complete set of assets subject to the deal, instead “fixing it first”: selling what they want to whom they want. The Commission has traditionally eschewed this approach because it reduces our ability to ensure the robustness of the divestiture and the quality of the buyer and because, without a consent order, there is no accountability should parties fail to meet their obligations. Fix-it-first transactions remove Commission oversight and increase the likelihood that competition will not be preserved and that consumers will be harmed.

As we warned when the Commission (actually, two sitting Commissioners

and a zombie vote) issued the ill-advised Prior Approval Policy, the broad and subjective factors enunciated in that policy lack limiting principles and are almost certain to lead to the routine imposition of prior approval provisions on geographic and product markets beyond those at issue in any given merger. We acknowledge that there are cases where the evidence supports the imposition of these more onerous remedies.¹⁰ This does not appear to be one of those cases.

We encourage comments during the public comment period regarding the statewide prior approval and nationwide prior notice provisions that appear in today’s consent order. In addition, we encourage comments on the implications of the agency’s apparent shift to an approach that incentivizes fix-it-firsts.

ACTION: Request for public comment.

SUMMARY: The Office of Head Start (OHS), Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS) requests public comment on an extension with no changes to

An Interim Final Rule with Comment Period (IFC) was published on November 30, 2021 that established the COVID-19 vaccination requirements whereby all Head Start staff, certain contractors, and volunteers must be vaccinated for COVID-19 by January 31, 2022. OHS requested and received emergency approval from the Office of Management and Budget (OMB) to implement the associated recordkeeping requirements for 6 months. This request will extend approval beyond the current expiration date (6/30/2022). ACF is currently in the final rulemaking process. If the requirements in the final rule differ from the IFC in a way that alters recordkeeping requirements, ACF will make those changes in coordination with OMB.

DATES: *Comments due within 30 days of publication.* OMB is required to make a decision concerning the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.
