[Project No. 15283-000]

The Chemical Market Analysis & Consulting Company, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On August 11, 2022, The Chemical Market Analysis & Consulting Company, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Fitler Bend Hydrokinetic Energy Project to be located on the Mississippi River in Issaquena County, Mississippi, and East Carroll Parish, Louisiana. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Filter Bend Hydrokinetic Project would consist of: (1) 2,000, 10 to 13 foot diameter, 750 kilowatt hydrokinetic turbine units arranged in arrays, typically two units wide and three units high, and generating power from the flow of the Mississippi River; (2) approximately 333 stand-alone pilings, installed in the river bottom, one for mounting each array; and (3) 34.6 kilovolt substations, constructed of masonry above the high-water mark of the riverbank, receiving power from the arrays, and interconnecting with potential industrial consumers. The total project would occupy much of the bottom of the Issaquena County, Mississippi side of an approximately 15 mile reach of Mississippi River. The project would have a total installed capacity of 1,500 megawatts and an average annual generation of 1.56 million megawatt-hours.
