

While retention of Everett has been raised as one possible solution, this panel will discuss the merits of other, longer-term solutions available to the region and the timelines for implementing them. Potential topics for discussion include: (1) new electric transmission interconnections with other regions; (2) the timing and impact of new offshore wind, onshore wind, and solar resource development; (3) transmission planning to enable efficient development of expected offshore wind additions; (4) increased natural gas pipeline infrastructure/capacity; and (5) increased oil and natural gas storage capability.

Panelists: To be announced.

3:15 p.m.–3:30 p.m.: Break

3:15 p.m.–4:30 p.m.: Panel 4: Path to Sustainable Solutions—Market Design

In Panel 4, Commissioners and panelists will discuss potential market solutions to New England's winter reliability challenges. Specifically, this panel will discuss any potential merits and benefits of market design changes to ISO-NE markets to enhance resource performance incentives, including incentives for resources to make advanced fuel procurements and/or maintain fuel inventories in the winter months; and align capacity market structure and rules with observed reliability risks—e.g., by reforming resource capacity accreditation and/or conducting prompt and/or seasonal capacity auctions.

Panelists: To be announced.

4:30 p.m.–5:00 p.m.: Closing Roundtable

In the Closing Roundtable, Commissioners and panelists will discuss what was learned through the presentations and panels and consider next steps. Topics will include what solutions stakeholders agree on pursuing and the timeline for implementing them as well as discussion of if, how, and when longer term solutions can be implemented sooner than currently expected.

Panelists: To be announced.
