Whaling Provisions; Aboriginal Subsistence Whaling Quotas

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; notification of quota for bowhead whales.

SUMMARY: NMFS notifies the public of the aboriginal subsistence whaling quota for bowhead whales assigned to the Alaska Eskimo Whaling Commission (AEWC), and of limitations on the use of the quota deriving from regulations of the International Whaling Commission (IWC). For 2023, the quota is 93 bowhead whales struck. This quota and other applicable limitations govern the harvest of bowhead whales by whaling captains of the AEWC.

DATES: Applicable February 8, 2023.

FOR FURTHER INFORMATION CONTACT: Mi Ae Kim, (301) 427-8365.

SUPPLEMENTARY INFORMATION: Aboriginal subsistence whaling in the United States is governed by the Whaling Convention Act (WCA) (16 U.S.C. 916 *et seq.*). Under the WCA, IWC regulations shall generally become effective with respect to all persons and vessels subject to the jurisdiction of the United States within 90 days of notification from the IWC Secretariat of an amendment to the IWC Schedule (16 U.S.C. 916k). Regulations that implement the WCA, found at 50 CFR part 230, require the Secretary of Commerce (Secretary) to publish, at least annually, aboriginal subsistence whaling quotas and any other limitations on aboriginal subsistence whaling deriving from regulations of the IWC.

At the 67th Meeting of the IWC, the Commission set catch limits for aboriginal subsistence use of bowhead whales from the Bering-Chukchi-Beaufort Seas stock. The bowhead and other aboriginal subsistence whaling

catch limits were based on a joint request by Denmark on behalf of Greenland, the Russian Federation, St. Vincent and the Grenadines, and the United States, accompanied by documentation concerning the needs of the Native groups.

The IWC set a 7-year block catch limit of 392 bowhead whales landed. For each of the years 2019 through 2025, the number of bowhead whales struck may not exceed 67, with unused strikes from the 3 prior quota blocks carried forward and added to the annual strike quota of subsequent years, provided that no more than 50 percent of the annual strike limit is added to the strike quota for any one year. For the 2023 harvest, there are 33 strikes available for carry-forward, so the combined strike quota set by the IWC for 2023 is 100 (67 + 33).

An arrangement between the United States and the Russian Federation ensures that the total quota of bowhead whales landed and struck in 2023 will not exceed the limits set by the IWC. Under this arrangement, the Russian natives may use no more than 7 strikes, and the Alaska natives may use no more than 93 strikes.

Through its cooperative agreement with the AEWC, NOAA has assigned 93 strikes to the Alaska Eskimo Whaling Commission. The AEWC will in turn allocate these strikes among the 11 villages whose cultural and subsistence needs have been documented, and will ensure that AEWC whaling captains use no more than 93 strikes.

At its 67th Meeting, the IWC also provided for automatic renewal of aboriginal subsistence whaling catch limits under certain circumstances. Commencing in 2026, bowhead whale catch limits shall be extended every 6 years provided: (a) the IWC Scientific Committee advises in 2024, and every 6 years thereafter, that such limits will not harm the stock; (b) the Commission does not receive a request from the United States or the Russian Federation for a change in the bowhead whale catch limits based on need; and (c) the Commission determines that the United States and the Russian Federation have complied with the IWC's approved timeline and that the information provided represents a status quo continuation of the hunts.

Other Limitations

The IWC regulations, as well as the NOAA regulation at 50 CFR 230.4(c), forbid the taking of calves or any whale accompanied by a calf.

NOAA regulations (at 50 CFR 230.4) also contain other prohibitions relating to aboriginal subsistence whaling, some of which are summarized here:

- No person, other than licensed whaling captains or crew under the control of those captains, may engage in aboriginal subsistence whaling.

- No AEWC whaling captain shall engage in whaling that is not in accordance with the regulations of the IWC, NOAA, and the cooperative agreement between NOAA and the AEWC.

- No whaling captain shall engage in whaling without an adequate crew or without adequate supplies and equipment.

- Crew may not receive money for participating in the hunt.

- No person may sell or offer for sale whale products from whales taken in the hunt, except for authentic articles of Native American handicrafts.

- Captains may not continue to whale after the relevant quota is taken, after the season has been closed, or if their licenses have been suspended.

- They may not engage in whaling in a wasteful manner.

Dated: February 3, 2023.

Director, Office of International Affairs, Trade, and Commerce, National Marine Fisheries Service.

Affected Public: Private sector: business or other for-profits, not-for-profit institutions.

Estimated Number of Respondents: 12,506.

Abstract: Regulation X¹ implements the Real Estate Settlement Procedures Act (RESPA).² Regulation X contains information collections in the form of various disclosure and recordkeeping requirements. The disclosures in this collection are required by the statute and implementing regulations. Regulation X requires these information collections. However, to the extent that compliance with requirements in Regulation Z³ provides an exemption from compliance with similar requirements in Regulation X, any relevant information collection burden is accounted for in OMB Control Number 3170-0015.

Request for Comments: Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the Bureau, including whether the information will have practical utility; (b) The accuracy of the Bureau's estimate of the burden of the collection of information, including the validity of the methods and the assumptions used; (c) Ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.
