Partial Rescission of Administrative Review

As noted in the *Preliminary Results*, the record of this administrative review indicates that the 18 companies listed in the appendix to this notice have no reviewable, suspended entries of subject merchandise during the POR. It is Commerce's practice to rescind an administrative review pursuant to 19 CFR 351.213(d)(3) when there are no reviewable entries of subject merchandise during the POR for which liquidation is suspended.⁴ In the *Preliminary Results*, we preliminarily determined to rescind this administrative review with respect to the 18 companies that have no reviewable, suspended entries of subject merchandise during the POR. We received no comments from interested parties with respect to this record information or the preliminary partial rescission of the administrative review. Therefore, we are rescinding this administrative review, in part, with respect to the 18 companies that have no reviewable entries during the POR.

Partial Deferral of Administrative Review

As noted in the *Preliminary Results*, we determined that there are no reviewable sales to an unaffiliated U.S. customer related to Cintas' POR entries of subject merchandise and preliminarily determined to defer Cintas' sales reporting until a subsequent review period.⁵ We received no comments from interested parties with respect to this record information. Therefore, we continue to find that Cintas has no reviewable sales during this POR and we are deferring Cintas' reporting of its sales to the subsequent review, contingent upon receiving a request for review of Cintas.

Assessment Rates

We will instruct U.S. Customs and Border Protection (CBP) to liquidate any suspended entries of subject merchandise for the 18 companies listed

in the appendix to this notice at the rate in effect at the time of entry. Consistent with its recent notice,⁶ Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.*, within 90 days of publication).

As Commerce has made a final determination to defer the review with respect to Cintas' suspended entries of subject merchandise during the POR, these entries will remain suspended until completion of the ongoing review of the antidumping duty order of welded line pipe from Turkey for the period December 1, 2019, through November 30, 2020.⁷ When Commerce completes its review and issues final results for the period December 1, 2019, through November 30, 2020, we will instruct CBP to assess antidumping duties on and liquidate Cintas' suspended entries of subject merchandise during the POR based on the final results of that review. If Commerce receives a timely withdrawal of the request to review Cintas and rescinds the review with respect to Cintas for the period December 1, 2019, through November 30, 2020, we will instruct CBP to assess antidumping duties on and liquidate Cintas' suspended entries of subject merchandise during the POR at the cash deposit rate in effect at the time of entry.

Cash Deposit Requirements

As Commerce has proceeded to a final rescission, in part, and final deferral, in part, of this administrative review, no cash deposit rates will change. Accordingly, the current cash deposit requirements shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could

result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order

This notice serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing these results in accordance with sections 751(a)(1) of the Act and 19 CFR 351.213(d).

Dated: March 30, 2021.

James Maeder,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

SUPPLEMENTARY INFORMATION: ONMS serves as the trustee for a network of underwater parks encompassing more than 620,000 square miles of marine and Great Lakes waters from Washington State to the Florida Keys, and from Lake Huron to American Samoa. The network includes a system of 14 national marine sanctuaries and Papahānaumokuākea and Rose Atoll marine national monuments. National marine sanctuaries protect our Nation's most vital coastal and marine natural and cultural resources, and through active research, management, and public engagement, sustain healthy environments that are the foundation for

thriving communities and stable economies.

One of the many ways ONMS ensures public participation in the designation and management of national marine sanctuaries is through the formation of advisory councils. The Sanctuary System Business Advisory Council (council) has been formed to provide advice and recommendations to the Director regarding the relationship of ONMS with the business community. Additional information on the council can be found at <https://sanctuaries.noaa.gov/management/bac/>.

Matters to be discussed: The meeting will include updates from ONMS, election of council officers, and possible formation of working groups to address issues related to sustainable recreation and tourism in national marine sanctuaries. SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data Workshop, (2) a series of assessment webinars, and (3) A Review Workshop. The product of the Data Workshop is a report that compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The assessment webinars produce a report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The product of the Review Workshop is an Assessment Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion during the Assessment Webinar are as follows:

1. Using datasets and initial assessment analysis recommended from the data webinars, panelists will employ assessment models to evaluate stock status, estimate population benchmarks and management criteria, and project future conditions.

2. Participants will recommend the most appropriate methods and configurations for determining stock status and estimating population parameters.
