The Commission derived the figures above using NERC's Business Plan and Budget Submissions, NERC's Compliance, Enforcement and Monitoring Plans, NERC's Performance Assessments, other information on NERC's Web site (<http://www.nerc.com/>), and internal FERC staff estimates. See the appendix for more details regarding the burden estimates.⁸

The total estimated annual cost burden to respondents is \$115,655,020 (\$15,128,199 + \$46,121,011 + \$54,405,810).

ERO Cost: 168,503 hours @ \$89.78/hr = \$15,128,199.

Regional Entity Cost: 593,120 hours @ \$77.76/hr = \$46,121,011.

Registered Entity Cost: 788,490 hours @ \$69/hr = \$54,405,810.

The hourly cost figures are loaded (i.e. includes salary and other personnel costs). The Commission used NERC's 2012 Business Plan and internal FERC salary estimates for these cost figures.

Comments: Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection;

⁶ In all instances below where the number of responses per respondent is "1" the Commission acknowledges that actual number of responses varies and cannot be estimated clearly.

⁷ N/A = not applicable.

⁸ The appendix will not be published in the **Federal Register**. The appendix is available in FERC's eLibrary system under the notice issuance in Docket No. IC12-11-000.

and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Natural Currents Energy Services, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On April 24, 2012, Natural Currents Energy Services, LLC filed an application, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Fisher's Island Tidal Energy Project, which would be located on the Long Island Sound in Suffolk County, New York. The proposed project would not use a dam or impoundment. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. The proposed project would consist of: (1) Installation of 50 NC Sea Dragon

tidal turbines at a rated capacity of 100 kilowatts, (2) an estimated 12.6 kilometers in length of additional transmission infrastructure, and (3) appurtenant facilities. Initial estimated production would be a minimum of 17,520 megawatt hours per year with the installation of 50 units.
