

scheduled to complete its review and issue an SER. Consequently, the licensee is required to submit two amendments within four months.

The SER with open items, which is scheduled to be issued by February 7, 2003, will identify proposed licensee commitments that change the CLB and are acceptable to the NRC. The applicant will be able to include these changes in an amendment that is submitted after the SER with open items is issued. The NRC staff can then review these changes and revise the SER, accordingly. Hence, submittal of a single amendment after the SER with open items is issued would be beneficial to the NRC staff and the licensee.

Therefore, submittal of two LRA amendments to satisfy the intent of section 54.21(b) and the application of the regulation, in this case, is not necessary to achieve the underlying purpose of the rule. The NRC staff finds that the exemption meets the requirement in Section 50.12(a)(2)(ii) that special circumstances exist to grant the exemption.

4.0 Conclusion

Accordingly, the Commission has determined that, pursuant to 10 CFR 54.15 and 10 CFR 50.12, the exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. The exemption allows the applicant to forgo submitting the annual LRA amendment provided it submits an LRA amendment at least three months before the scheduled completion of the NRC's review. Therefore, the Commission hereby grants FPL the proposed exemption from the requirements of 10 CFR 54.21(b) for St. Lucie, Units 1 and 2, based on the circumstances described herein.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will not have a significant effect on the quality of the human environment (67 FR 69254).

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 19th day of November, 2002.

For the Nuclear Regulatory Commission.

David B. Matthews,

Director, Division of Regulatory Improvement Programs, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Nuclear Waste; Request for Candidates

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice.

SUMMARY: The U.S. Nuclear Regulatory Commission seeks qualified candidates for the Advisory Committee on Nuclear Waste. Submit resume's to: Ms. Sherry Meador, Administrative Assistant, ACRS/ACNW, Mail Stop T2E-26, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or e-mail address SAM@NRC.gov.

SUPPLEMENTARY INFORMATION: The Commission established the Advisory Committee on Nuclear Waste (ACNW) to provide independent technical review of and advice on matters related to the management of nuclear waste, including all aspects of nuclear waste disposal facilities, as directed by the Commission. The ACNW undertakes independent studies and reviews related to disposal, storage, and transportation of both high- and low-level radioactive waste including interim storage of spent nuclear fuel; materials safety; and facilities decommissioning. This encompasses activities related to rulemakings, associated regulatory guides, and technical positions developed to support and clarify NRC's nuclear materials and radioactive waste regulations. Committee members are selected from a variety of engineering and scientific disciplines, such as risk assessment, chemistry, mechanical engineering, civil engineering, materials sciences, and the earth sciences. At this time, candidates are being sought who have 15-20 years of experience, including graduate level education, in the management and disposal of radioactive waste. Committee members serve a 4-year term with the possibility of reappointment for a total service of 8 years.

Criteria used to evaluate candidates include education and experience, demonstrated skills in nuclear waste management matters, and the ability to solve complex technical problems. The Commission, in selecting its Committee members, considers the need for a specific expertise to accomplish the work expected to be before the ACNW. For this position, the expertise must be directly related to the area of radioactive waste disposal, site remediation and closure activities, nuclear fuel reprocessing, chemistry, chemical exchange processes, and nuclear fuel cycle. Consistent with the requirements

of the Federal Advisory Committee Act, the Commission seeks candidates with diverse backgrounds, so that the membership on the Committee will be fairly balanced in terms of the points of view represented and functions to be performed by the Committee.

Candidates for ACNW appointments may be involved in or have financial interests related to NRC-regulated aspects of the nuclear industry. Because conflict-of-interest considerations may restrict the participation of a candidate in ACNW activities, the degree and nature of any such restriction on an individual's activities as a member will be considered in the selection process. Each qualified candidate's financial interests must be reconciled with applicable Federal and NRC rules and regulations prior to final appointment. This might require divestiture of securities or discontinuance of certain contracts or grants. Information regarding these restrictions will be provided upon request.

A resume describing the educational and professional background of the candidate, including any special accomplishments and professional references should be provided. Candidates should provide their current address, telephone number, and e-mail address. All candidates will receive careful consideration. Appointment will be made without regard to such factors as race, color, religion, national origin, sex, age, or disabilities. Candidates must be citizens of the United States and be able to devote approximately 70-100 days per year to Committee business. Applications will be accepted until January 17, 2003.

Dated: November 20, 2002.

Andrew L. Bates,

Advisory Committee Management Officer.
