DEPARTMENT OF THE INTERIOR**Bureau of Reclamation**

[INT–FES–04–09]

Banks Lake Drawdown, Columbia Basin Project, Washington

AGENCY: Bureau of Reclamation,
Interior.

ACTION: Notice of availability of the
Banks Lake Drawdown final
environmental impact statement.

SUMMARY: Pursuant to section 102(2)(C)
of the National Environmental Policy
Act of 1969, as amended, the
Department of the Interior, Bureau of
Reclamation (Reclamation), has
prepared a final environmental impact
statement (Final EIS) that examines the
impacts of annually lowering the water
surface elevation of Banks Lake in
August.

The Final EIS evaluates two
alternatives. The Action Alternative
describes the resource conditions that
would occur with Banks Lake water
surface elevations between 1570 feet
and 1560 feet, while the No Action
Alternative describes the conditions that
would occur without the action, with
surface elevation between 1570 feet and
1565 feet. Both the No Action and
Action Alternatives include four
possible operational scenarios that
could occur within their respective
ranges, depending upon the hydrology
of each year. The Action Alternative
refills the reservoir to elevation 1565 by
September 10 and to 1570 feet by
September 22. The No Action
Alternative also refills to 1570 feet
elevation by September 22.

The Final EIS includes the comment
letters received on the Draft EIS and
Reclamation's responses to those
comments, as well as a summary of
comments from the public hearings.
Changes from the Draft EIS include
minor revisions and additions to the
analysis as a result of review comments.
The No Action Alternative is identified
as the preferred alternative in the Final
EIS.

A Record of Decision (ROD)
identifying the alternative chosen for
implementation, and discussing factors
for its selection, is anticipated by June,
2004.

ADDRESSES: Copies of the Final EIS are
available for public review and
inspection at the locations listed in the
Supplementary Information Section.

FOR FURTHER INFORMATION CONTACT: Mr.
Jim Blanchard, Special Projects Officer,
at (509) 754–0226 (relay users may dial
711). Those wishing to obtain a copy of
the Final EIS in the form of a printed
document or a compact disk (CD–ROM
with reader included), or a summary of
the Final EIS may contact Mr.
Blanchard.

SUPPLEMENTARY INFORMATION: Since its
creation in the early 1950s, Banks Lake
has been operated and maintained for
the storage and delivery of irrigation
water drawn from the Columbia River to
Columbia Basin Project (CBP) lands.
Reclamation operates the reservoir
within established constraints on water
surface elevation to meet contractual
obligations, ensure public safety, and
protect property. Reclamation considers
other resource needs as feasible within
existing operational constraints.

In December of 2000, the National
Marine Fisheries Service issued a
Biological Opinion (BiOp) to the Bureau
of Reclamation, Bonneville Power
Administration and the U.S. Army
Corps of Engineers for the operation of

the Federal Columbia River Power
System. The BiOp's Reasonable and
Prudent Alternative (RPA) included
Action 31 that advised Reclamation to
“assess the likely environmental effects
of operation of Banks Lake up to 10 feet
down from full pool during August.”
Reclamation has completed RPA Action
31 by preparing the Banks Lake
Drawdown Environmental Impact
Statement which describes and analyzes
the environmental effects of lowering
the August surface elevation of Banks
Lake annually to elevation 1560 feet,
which is 10 feet below full pool.
