SUPPLEMENTARY INFORMATION:

Regulatory History

This request constitutes the 30-day notice required by OMB. The Coast Guard has already published [65 FR 7094 (February 11, 2000)] the 60-day notice required by OMB. That request elicited the following comments.

The comment concerned ICR 2115–0025—Oil Record Book for Ships. It suggested the following changes to the Oil Record Book for Ships: (1) “On page 13 the instructions say to ‘circle one’ and then present the choice of cargo/ballast of machinery space. On the remaining pages there is no choice given.” (2) “Under the code and item numbers for tankers, the instructions under the letter K lists the operations to be documented when discharging clean ballast. These operations are written to confirm [sic] to Marpol regulations where clean ballast does not have to be monitored. Under 33 CFR 157.43 clean ballast [sic] discharges must go thru the cargo monitor. It would follow that a listed operation such as H 37 [sic] Was the discharge monitoring and control system in operation’ should be included under H.”

The Coast Guard has reviewed and concurs with the first suggested change and will make the corrections when the book is revised. While the second suggestion is a good one, the Coast Guard will consider it when it reviews the book for the next revision. On April 6, 2000, we replied to the commentor and sent copies to OMB.

Request for Comments

The Coast Guard invites comments on the proposed collections of information to determine whether the collections are necessary for the proper performance of the functions of the Department. In particular, the Coast Guard would appreciate comments addressing: (1) The practical utility of the collections; (2) the accuracy of the Department’s estimated burden of the collections; (3) ways to enhance the quality, utility, and clarity of the information that is the subject of the collections; and (4) ways to minimize the burden of collections on respondents, including the use of automated collection techniques or other forms of information technology.

Comments, to DMS or OIRA, must contain the OMB Control Numbers of all ICRs addressed. Comments to DMS must contain the docket number of this

request, USCG–2000–6847. Comments to OIRA are best assured of having their full effect if OIRA receives them 30 or fewer days after the publication of this request.
