DEPARTMENT OF HEALTH AND HUMAN SERVICES**Centers for Disease Control and Prevention**

[Docket No. CDC-2019-0103]

Reporting of Pregnancy Success Rates from Assisted Reproductive Technology (ART) Programs; Proposed Additional Data Collection Fields and Modified Reporting Requirements; Final Notice

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: General notice.

SUMMARY: The Centers for Disease Control and Prevention (CDC) within the Department of Health and Human Services (HHS) announces revised plans for additional data fields and modified reporting requirements for Assisted Reproductive Technology (ART) programs pursuant to the Fertility Clinic Success Rate and Certification Act of 1992 (FCSRCA). This notice also responds to public comments received in response to CDC's 2019 request for comment.

DATES: The requirements for the additional data fields and modified reporting requirements will be implemented for reporting year 2021.

FOR FURTHER INFORMATION CONTACT: Mithi Sunderam, Division of Reproductive Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease

Control and Prevention, 4770 Buford Highway NE, Mailstop S107-2, Atlanta, Georgia 30341; Telephone: 1-800-232-4636; Email: ARTinfo@cdc.gov.

SUPPLEMENTARY INFORMATION: On November 6, 2019, CDC published a notice in the **Federal Register** (84 FR 59814) requesting comments on a plan proposing that ART programs collect additional information, listed below.

(i) For intended parents who are not oocyte source or pregnancy carriers under Section A (Patient Demographic Information): race/ethnicity.

(ii) For oocyte donors under Section D (Oocyte Source and Carrier Information): height, weight, smoking history, and other key pregnancy, diagnostic, and reproductive history (including number of prior pregnancies [ectopic, spontaneous abortions]; number of prior births [full term, preterm, live births, stillbirths]; history of prior ART cycles [fresh, frozen]; maximum follicle-stimulating hormone (FSH) level [value in mIU/mL]; and most recent anti-müllerian hormone (AMH) level [value in ng/mL, date]).

(iii) For both fresh embryo transfers and thawed embryo transfers, under Section H (Transfer Information): clinic names if oocyte retrievals took place in a clinic different from the one performing the transfer.

CDC also proposed changes in reporting responsibilities when multiple ART programs were involved in performing one cycle (such as different ART programs responsible for ovarian stimulation, oocyte retrieval, and/or embryo transfer), moving the reporting obligations from the ART program that accepts responsibility for embryo culture to the ART program that directs the clinical management of the cycle.

Public Comment Summary and Responses

CDC received three comments (two comments from researchers and one from the Society for Assisted Reproductive Technology) in response to its request for comment. Summaries of these comments and CDC's responses are provided below.

1. One commenter cautioned that embryos shipped between centers often arrive without retrieval information, such as dates of retrieval. The commenter was otherwise supportive of collecting additional information for embryos shipped from different centers, as it would improve the accuracy of calculating cumulative success rates.

Response: CDC thanks the commenter for providing this comment. Accurate documentation of oocyte retrieval dates is important for establishing cumulative
