

- *NSB Public Service Award.* The National Science Board established the Public Service Award in November 1996 to honor individuals and groups that have made substantial contributions to increasing public understanding of science and engineering in the United States. These contributions may be in a wide variety of areas that have the potential of contributing to public understanding of and appreciation for science and engineering—including mass media, education and/or training programs, and entertainment.

- *Presidential Awards for Excellence in Science, Mathematics and Engineering Mentoring (PAESMEM) program.* In 1996, the White House, through the National Science and Technology Council (NSTC) and the Office of Science and Technology Policy (OSTP), established the Presidential Awards for Excellence in Science, Mathematics and Engineering Mentoring (PAESMEM) program. The program, administered on behalf of the White House by the National Science Foundation, seeks to identify outstanding mentoring efforts or programs designed to enhance the participation of groups (women, minorities and persons with disabilities as well as groups from low socioeconomic regions) underrepresented in science, mathematics and engineering. The awardees will serve as exemplars to their colleagues and will be leaders in the national effort to more fully develop the Nation's human resources in science, mathematics and engineering. This award is managed at NSF by the Directorate for Education and Human Resources (EHR).

- *Presidential Award for Excellence in Mathematics and Science Teaching.* The Presidential Award for Excellence in Mathematics and Science Teaching (PAEMST) is the highest recognition that a kindergarten through 12th-grade mathematics or science teacher may receive for outstanding teaching in the United States. Enacted by Congress in 1983, this program authorizes the President to bestow 108 awards with two per state or jurisdiction, assuming there are qualified applicants. Awards are given in the science category, which includes science and engineering, and the mathematics category, which includes mathematics, technology and computer science. In even-numbered years, nominations are accepted for elementary teachers (grades K–6); in odd-numbered years, secondary teachers (grades 7–12) are nominated. This award is managed at NSF by the

Directorate for Education and Human Resources (EHR).

*Estimate of Burden:* These are annual award programs with application deadlines varying according to the program. Public burden also may vary according to program; however, across all the programs, it is estimated that each submission will average 23 hours per respondent. If the nominator is thoroughly familiar with the disciplinary background of the nominee, time spent to complete the nomination may be considerably reduced. Once provisionally selected, on behalf of OSTP, NSF may collect information from the potential Presidential award honorees necessary for OSTP to complete a background check. The estimated time for completion is ten minutes per respondent, including reviewing the instructions.

*Respondents:* Individuals, businesses or other for-profit organizations, universities, non-profit institutions, and Federal and State governments.

*Estimated Number of Responses per Award:* 1,800 responses, broken down as follows: For the President's National Medal of Science, 80; background check form, 15; for the Alan T. Waterman Award, 70; for the Vannevar Bush Award, 20; for the Public Service Award, 30; for the PAESMEM, 200; and 1,400 for the PAEMST.

*Estimated Total Annual Burden on Respondents:* 41,974 hours, broken down by 1,600 hours for the President's National Medal of Science nominations (20 hours per 80 respondents) and three hours for the background check information for approximately 15–20 honorees; 2,000 hours for the Alan T. Waterman Award (20 hours per 100 respondents); 300 hours for the Vannevar Bush Award (15 hours per 20 respondents); 450 hours for the Public Service Award (15 hours per 30 respondents); 4,000 hours for the PAESMEM (20 hours per 200 respondents) and three hours for the background check information for approximately 15 honorees; and 33,600 hours for the PAEMST (24 hours per 1400 respondents) and 18 hours for the background check information for approximately 108 honorees.

*Frequency of Responses:* Annually.

*Comments:* Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents,

including through the use of automated collection techniques or other forms of information technology; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.
