The general purpose of the research is to study various aspects of disease afflicting marine mammals. Infectious disease investigations include viral pathogens such as West Nile virus, St. Louis Encephalitis virus, herpesvirus, and poxviruses. Other projects include development of a marine mammal histology database and atlas, research on the effects of boat strikes on cetacean bone, and investigation into acute phase proteins in cetaceans. Cell lines are proposed to be developed for some projects. The applicant has requested authorization to receive, import, and export specimen samples (hard and soft parts) world-wide from all marine mammals under NMFS jurisdiction (up to 250 samples per species per year). Specimens that would be received, imported, and exported would be taken from the following sources in the U.S. and/or abroad: (1) routine husbandry sampling of captive animals; (2) samples taken from live animals by other permitted/authorized researchers; (3) samples taken from stranded animals; and (4) samples taken from animals during legal subsistence hunts.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Notice of Availability of the Mobile Launch Platform Environmental Assessment and Draft Finding of No Significant Impact

AGENCY: Missile Defense Agency, Department of Defense.

ACTION: Notice of availability and request for comments.

SUMMARY: In accordance with National Environmental Policy Act (NEPA) regulations, the Missile Defense Agency (MDA) is initiating a public review and comment period for an Environmental Assessment (EA) and Draft Finding of No Significant Impact (FONSI). This notice announces the availability of the Mobile Launch Platform (MLP) EA that analyzes the potential environmental impacts of activities associated with using the existing MLP as a platform for testing sensors and launching target and interceptor missiles. The MLP could operate from any of the following locations: Western Range, Pacific Missile Range Facility (PMRF)/Kauai Test Facility (KTF), U.S. Army Kwajalein Atoll (USAKA)/Ronald Reagan Ballistic Missile Defense Test Site (RTS), and the Board Ocean Area (BOA) of the Pacific Ocean. The EA considers the impacts resulting from the proposed use of the MLP to support specific tests. The EA also considers cumulative impacts associated with the proposed use of the MLP to support test events.

Based on the analysis documented in the EA, the MDA has concluded that no significant impacts are expected to result from the proposed action. The Draft FONSI was prepared to document this preliminary conclusion.

DATES: The public review and comment period for this EA and Draft FONSI begins with the publication of this notice in the **Federal Register**. All comments on this EA and Draft FONSI
