II. Background

We are required to publish this notice in the **Federal Register** under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, we have submitted to the Office of Management and Budget (OMB) the following requirements for emergency review. We are requesting an emergency review because the collection of this information is needed before the expiration of the normal time limits under OMB's regulations under section 1320.13 of title 5 of the *Code of Federal Regulations* (CFR). We cannot reasonably comply with the normal clearance procedures because an unanticipated event has occurred, as stated in 5 CFR 1320.13(a)(2)(ii). This information collection only addresses the incremental burden change to an existing clearance and not the total burden for the clearance.

1. *The title of the information collection*: Part 20 Respirator Protection Exemption Request for Non-Power Reactors/RTR And Part 20 Respirator Protection Exemption Request for Power Reactors Online Forms.

2. *OMB approval number*: 3150–0014.

3. *Type of submission*: Revision.

4. *The form number, if applicable*: There is no form number for the online submission form.

5. *How often the collection is required or requested*: On Occasion.

6. *Who will be required or asked to respond*: All holders of, and certain applicants for, nuclear power plant construction permits and operating licenses under the provisions of 10 CFR part 50, "Domestic Licensing of Production and Utilization Facilities" who seek exemptions from the medical evaluation frequency and fit-testing frequency requirements specified in 10 CFR 20.1703(c)(5)(iii) and 10 CFR 20.1703(c)(6), as allowed by 10 CFR 20.2301 "Applications for exemptions."

7. *The estimated number of annual responses*: 60.

8. *The estimated number of annual respondents*: 60.

9. *The estimated number of hours needed annually to comply with the*

information collection requirement or request: 120.

10. *Abstract*: The NRC requested an emergency review of this information collection in order to add this form to the previously approved information collection OMB Control Number 3150–0014 for a period of 6 months. The purpose of this information collection is to introduce the Part 20 Respirator Protection Exemption Request for Non-Power Reactors/RTR and the Part 20 Respirator Protection Exemption Request for Power Reactors Online Forms that simplifies the filing the exemption requests because the existing system may be too burdensome for licensees under current conditions. Under the existing collection under OMB Control No. 3150–0014, licensees are already able to seek exemptions from the requirements of 10 CFR part 20, Standards for Protection Against Radiation. This information collection only addresses the incremental burden change to this existing clearance due to the form and not the total burden for the clearance.

10 CFR part 20 contains specific requirements for respiratory protection. Due to the impacts of the COVID–19 public health emergency (PHE), the NRC will also consider exemption requests for the medical evaluation frequency and fit-testing frequency requirements specified in 10 CFR 20.1703(c)(5)(iii) and 10 CFR 20.1703(c)(6); these exemptions would allow delay of these requirements during the COVID–19 PHE as allowed by 10 CFR 20.2301 "Applications for exemptions."

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the estimate of the burden of the information collection accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated: May 21, 2020.
