Synopsis

1. Section 304 of the Satellite
 Television Extension and Localism Act
 of 2010 (STELA) requires the
 Commission to submit a report on in-
 state broadcast programming to the
 appropriate Congressional committees
 no later than 18 months after its
 enactment (*i.e.*, August 27, 2011).
 Satellite Television Extension and
 Localism Act of 2010, Title V of the
 "American Workers, State, and Business
 Relief Act of 2010," Public Law 111-
 175, 124 Stat. 1218 (2010). By this
 Public Notice, the Media Bureau
 (Bureau) seeks comment for use in
 preparation of the required report.
 2. Specifically, Section 304 of STELA
 states:

SEC. 304. REPORT ON IN-STATE
 BROADCAST PROGRAMMING. Not later
 than 18 months after the date of the
 enactment of this Act, the Federal
 Communications Commission shall submit to
 the appropriate Congressional committees a
 report containing an analysis of—

(1) The number of households in a State
 that receive the signals of local broadcast
 stations assigned to a community of license
 that is located in a different State;

(2) the extent to which consumers in each
 local market have access to in-state broadcast
 programming over the air or from a
 multichannel video programming distributor;
 and

(3) whether there are alternatives to the use
 of designated market areas, as defined in
 section 122 of title 17, United States Code,
 to define local markets that would provide
 more consumers with in-state broadcast
 programming.

3. To analyze the issues relating to the
 availability of in-state broadcast stations
 for consumers, the Bureau seeks
 comment generally regarding the
 appropriate methodologies, metrics,
 data sources, and level of granularity we
 should use for our report to Congress
 required under Section 304. We also
 seek comment regarding our
 interpretation of and metrics
 appropriate for each of the specific
 subsections of Section 304. In addition,
 the Bureau requests data for use in
 preparation of the report.

4. *Section 304(1):* Section 304(1)
 requires the Commission to estimate the
 number of households in a state that
 receive the signals of local broadcast
 stations assigned to a community of
 license that is located in a different
 state. The Bureau proposes to use OET
 Bulletin No. 69 (OET 69) methodology
 to estimate the number of households in
 each broadcast television station's

service area. OET Bulletin 69, available
 at [http://www.fcc.gov/oet/info/
 documents/bulletins/#69](http://www.fcc.gov/oet/info/documents/bulletins/#69), provides
 guidance on the use of the Longley-Rice
 propagation model and U.S. Census
 blocks to evaluate TV service coverage
 and interference. The Bureau seeks
 comment on the use of OET 69 and
 which stations to include in the analysis
 (*i.e.*, commercial, noncommercial
 educational, Class A, translators,
 satellite, and/or low-power).

5. *Section 304(2):* Section 304(2)
 requires the Commission to estimate the
 extent to which consumers in each local
 market have access to in-state broadcast
 programming over-the-air or from a
 multichannel video programming
 distributor (MVPD). The Bureau
 proposes that the term "consumers"
 should be interpreted as households, the
 term "local market" should be
 interpreted as the designated market
 area (DMA), and the term "access"
 should refer to the ability to obtain a
 television station's broadcast
 programming. The Bureau seeks
 comment on the interpretation of these
 terms.

6. The Bureau seeks comment on
 whether the intent of the Section 304(2)
 analysis is to identify geographic areas
 (*e.g.*, counties) and associated
 populations within specific states that
 have limited access to in-state broadcast
 programming and whether analysis
 based on DMAs will identify these
 geographic areas and populations. The
 Bureau also seeks comment on whether
 other criteria should be considered,
 such as network affiliation or whether
 the stations offer local news. To
 measure the "extent" to which
 consumers in each local market have
 access to in-state broadcast
 programming, the Bureau intends to
 collect, aggregate, and compare data
 based on DMAs and counties and
 requests data on a DMA and county
 basis. Commenters also are invited to
 suggest and provide data for other
 geographic areas that would be
 responsive to the directive of Section
 304(2). Commenters are asked to submit
 any other data that they believe will
 assist the Commission in preparing the
 report.

7. In addition, the Bureau seeks
 comment on three possible approaches
 for measuring the extent of access to in-
 state broadcast programming, whereby
 we would estimate the number of
 households that have access to (1) a
 specific number of in-state stations, (2)
 some percentage of their broadcast
 programming from in-state stations, or
 (3) some percentage of the stations
 licensed to communities in their state.
 The Bureau asks commenting parties to

provide data associated with the approach recommended, or to direct the Commission to any outside data sources where such specific data may be available.

8. For the Section 304(2) analysis, the Bureau proposes to use the Longley-Rice methodology to estimate access to broadcast programming over-the-air and data from the Annual Report of Cable Television Systems, FCC Form 325, to estimate access to broadcast programming carried by some, but not all, cable systems. The Bureau requests that all MVPDs provide information on the broadcast stations they carry on their systems and whether they carry the same broadcast stations throughout the DMA, county or other geographic area. The Bureau seeks comment on the proposed sources of data for estimating over-the-air and MVPD access to broadcast programming and whether there are other sources of data that would provide more reliable estimates. The Bureau also seeks comment on the appropriate methodology for combining broadcast and MVPD data that may be collected from different sources using different geographic bases and the most appropriate way to aggregate data from broadcast, cable, DBS, and other MVPDs. Commenters are requested to provide relevant data or data sources associated with the methodology they recommend.

9. The Bureau seeks comment on whether and how to include information for the United States Virgin Islands, Puerto Rico, and Guam in this report. The Bureau also requests that MVPDs provide data to measure the extent of access to in-state broadcast programming in these three geographic areas.

10. *Section 304(3)*: Section 304(3) requires the Commission to consider alternatives to the use of DMAs to define local markets that would provide more consumers with in-state broadcast programming. DMAs are used in the planning and purchase of television advertising and are also referenced in FCC regulations regarding the carriage of broadcast television stations on cable and DBS systems and in the media ownership rules. As such, redefining local markets with alternative geographic areas would likely affect viewers, the advertising market, the number of stations carried by MVPDs, and ownership of stations. The Bureau seeks comment on alternatives to the use of DMAs and the effects of alternatives on viewers, advertising markets, number of stations carried by MVPDs, ownership of stations, network affiliation agreements, and areas of exclusivity.

Procedural Matters

11. *Ex Parte Rules*. There are no ex parte or disclosure requirements applicable to this proceeding pursuant to 47 CFR 1.204(b)(1).

12. *Comment Information*. Pursuant to sections 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments and reply comments on or before the dates indicated on the first page of this document. Comments may be filed using: (1) The Commission's Electronic Comment Filing System (ECFS), (2) the Federal Government's eRulemaking Portal, or (3) by filing paper copies.
