

the labeler for rebates and the UROA to report onto CMS-64. The monthly data is used to calculate Federal Upper Limit (FUL) prices for applicable drugs and for states that opt to use this data to establish their pharmacy reimbursement methodology. In this 2023 iteration, we adding a new use of the reported data. The new use would allow us to calculate inflationary rebates under the Inflation Reduction Act of 2022. The change has no impact on our burden estimates. We are not revising any of our reporting forms. *Form Number:* CMS-367a, b, c, d, and e (OMB control number: 0938-0578); *Frequency:* Monthly, quarterly, and on occasion; *Affected Public:* Private sector (Business or other for-profits); *Number of Respondents:* 818; *Total Annual Responses:* 15,742; *Total Annual Hours:* 591,042. 4. Type of Information Collection
Request: Extension of a currently approved collection; *Title of Information Collection:* Testing Experience and Functional Tools (TEFT); Functional Assessment Standardized Items (FASI) Based on the CARE Tool; *Use:* As part of the National Testing Experience and Functional Assessment Tools (TEFT) demonstration, CMS tested the use of functional assessment standardized items (FASI) among community-based long term services and supports (CB-LTSS) populations. The TEFT initiative built on the national efforts to create electronically exchangeable data across providers and the caregiving team to develop more person-centered services under the Medicare and Medicaid programs. After conclusion of the field test, states have begun implementing the related FASI performance measures and the FASI team continues to recruit additional states. While the team has not conducted data collection since the FASI field test in 2017, and that there are no concrete immediate plans to collect new data, new data collection to support measure re-endorsement activities due in 2025 will be needed. The data collection may also need to be conducted sooner if significant changes are made to the measures' technical specifications, in the interim. Due to the uncertainty on when data collection may need to be done, an extension of the existing package and a subsequent revision would facilitate expedient resumption of the data collection and testing efforts, especially given the quick turnaround time for activities (such as National Quality Forum

measure endorsement) which depend on the data collection.

FASI is based on a subset of the July 27, 2007 (72 FR 144) Continuity Assessment Record and Evaluation (CARE) items which are now included in post-acute setting Federal assessment forms for nursing facilities—Resident Assessment Instrument (RAI) Minimum Data Set (MDS), Inpatient Rehabilitation Facilities Patient Assessment Instrument (IRF-PAI), and Long Term Care Hospitals Continuity Assessment Record & Evaluation (CARE) Data Set (LCDS) to measure function in a standardized way. The FASI items include the standardized mobility and self-care items included in the MDS, IRF-PAI, and LCDS as well as some additional mobility items appropriate to measuring independence in the community and personal preferences or goals items related to function. Also included are certain instrumental activities of daily living and some modified caregiver assistance items from the Home Health Outcome and Assessment Information Set (OASIS) tool. A few additional items to describe the populations' age, gender, and geographic area of residence are also included. Use of the same items to measure functional status in nursing facilities and community-based programs will help states report on their rebalancing efforts. Also, because these items will have electronic specifications developed by CMS, they can assist state efforts to develop exchangeable electronic data to follow the person across services and estimate total costs as well as measure functional status across time. The complete FASI set is included in this information collection request. *Form Number:* CMS-10243 (OMB control number: 0938-1037); *Frequency:* On occasion; *Affected Public:* Individuals and Households; *Number of Respondents:* 1,570; *Total Annual Responses:* 1,570; *Total Annual Hours:* 785.
