Title: FERC–598, Self-Certification for Entities Seeking Exempt Wholesale Generator or Foreign Utility Company Status.

OMB Control No.: 1902–0166.

Type of Request: Three-year renewal of FERC–598.

Abstract: Under 42 U.S.C. 16452(a), public-utility holding companies and their associates must maintain, and make available to the Commission, certain books, accounts, memoranda, and other records. The pertinent records are those that the Commission has determined: (1) Are relevant to costs incurred by a public-utility company that is an associate company of such holding company; and (2) are necessary or appropriate for the protection of utility customers with respect to jurisdictional rates.

Public-utility holding companies and their associates may seek exemption from this requirement. The pertinent statutory and regulatory provisions, 42 U.S.C. 16454 and 18 CFR 366.7, authorize such entities to file with the Commission a notice of self-certification demonstrating that their public-utility companies are “exempt wholesale generators” (EWGs) or “foreign utility companies” (FUCOs). If the Commission takes no action on a good-faith self-certification filing within 60 days after the date of filing, the applicant is exempt from the requirements of 42 U.S.C. 16452(a).

An EWG is defined as “any person engaged directly, or indirectly through one or more affiliates . . . and exclusively in the business of owning or operating, or both owning and operating, all or part of one or more eligible facilities and selling electric energy at wholesale.”¹ A FUCO is defined as “any company that owns or

operates facilities that are not located in any state and that are used for the generation, transmission, or distribution of electric energy for sale or the distribution at retail of natural or manufactured gas for heat, light, or power, if such company: (1) derives no part of its income, directly or indirectly, from the generation, transmission, or distribution of electric energy for sale or the distribution at retail of natural or manufactured gas for heat, light, or power, within the United States; and (2) [n]either the company nor any of its subsidiary companies is a public-utility company operating in the United States.”²

In the case of EWGs, the person filing a notice of self-certification must also file a copy of the notice of self-certification with the state regulatory authority of the state in which the facility is located. In addition, that person must represent to the Commission in its submission that it has filed a copy of the notice with the appropriate state regulatory authority.³

In accordance with OMB requirements,⁴ the Commission issued and published a 60-day notice inviting public comments. The Commission issued the 60-day Notice on October 30, 2020, and published it in the **Federal Register** on November 5, 2020.⁵ The Commission received no comments in response.

Type of Respondents: EWGs and FUCOs.

*Estimate of Annual Burden:*⁶ The Commission estimates the total annual burden and cost⁷ for this information collection as follows:

² *Id.*

³ 18 CFR 366.7(a).

⁴ 5 CFR 1320.8(d).

⁵ 85 FR 70604.

⁶ “Burden” is the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 CFR 1320.3.

⁷ The Commission staff thinks that the average respondent for this collection is similarly situated to the Commission, in terms of salary plus benefits. Based upon FERC’s FY 2020 annual full-time equivalent average of \$172,329 (for salary plus benefits), the average hourly cost is \$83 per hour.

¹ 18 CFR 366.1.

Comments: Comments are invited on:

- (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility;
