**FOR FURTHER INFORMATION CONTACT:** Karla Yeakle, (202) 606-0299.

**SUPPLEMENTARY INFORMATION:** The FERS Act of 1986, Public Law 99-335, created a new retirement system intended to cover most Federal employees hired after 1983. Most Federal employees hired before 1984 are under the older Civil Service Retirement System (CSRS). Section 8423 of title 5, United States Code, as added by the FERS Act of 1986, provides for the payment of the Government's share of the cost of the retirement system under FERS. Employees' contributions are established by law and constitute only a portion of the cost of funding the retirement system; employing agencies are required to pay the remaining costs. The amount of funding required, known as "normal cost," is the entry age normal cost of the provisions of FERS that relate to the Civil Service Retirement and Disability Fund (Fund). The normal cost must be computed by OPM in accordance with generally accepted actuarial practices and standards (using dynamic assumptions). The normal cost calculations depend on economic and demographic assumptions. Subpart D of part 841 of title 5, Code of Federal Regulations, regulates how normal costs are determined.

In its meeting on May 10, 2022, the Board of Actuaries of the Civil Service Retirement System (the Board) recommended revisions to the demographic assumptions used in the actuarial valuations of CSRS and FERS. The demographic assumptions include assumed rates of future mortality, employee withdrawal, retirement, and merit and longevity pay increases. The Board reviewed the long-term economic assumptions and determined that they should remain unchanged. OPM has adopted the Board's recommendations.
