Animal and Plant Health Inspection Service

Title: Highly Pathogenic Avian Influenza; Additional Restrictions.

OMB Control Number: 0579-0245.

Summary of Collection: Disease prevention is the most effective method for maintaining a healthy animal population and enhancing the Animal and Plant Health Inspection Service (APHIS) ability to compete in the world market of animal and animal product trade. Title 21 U.S.C. authorizes sections 111, 114, 114a, 114-1, 115, 120, 121, 125, 126, 134a, 134c, 134f, and 134g. These authorities permit the Secretary to prevent, control, and eliminate domestic diseases such as brucellosis, as well as to take actions to prevent and to manage exotic diseases such as highly pathogenic avian influenza and other foreign animal diseases. Highly pathogenic avian influenza is an extremely infectious and fatal form of influenza in chickens and can strike poultry quickly without any warning signs. To protect the United States against an incursion of highly pathogenic avian influenza, APHIS published an interim rule to prohibit or restrict the importation of birds, poultry, and unprocessed bird and poultry products from regions that have reported the presence of the H5N1 subtype of highly pathogenic avian influenza.

Need and Use of the Information: APHIS will collect the information to ensure that U.S. origin pet birds undergo appropriate examinations before entering the United States. Without the information, it would be impossible for APHIS to establish an

effective line of defense against an introduction of highly pathogenic avian influenza.

Description of Respondents: Farms; Individuals or households; Federal Government.

Number of Respondents: 5,000.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 5,000.

Animal and Plant Health Inspection Service

Title: Karnal Bunt; Compensation for Custom Harvesters in Northern Texas.

OMB Control Number: 0579-0248.

Summary of Collection: Under the Plant Protection Act (PPA) (7 U.S.C. 7701-7772), the Animal and Plant Health Inspection Service (APHIS) has the responsibility and authorization to prohibit or restrict the importation, entry, or movement of plant and plant pests in the United States. The regulations regarding Karnal Bunt are set forth in 7 CFR Parts 301.89-1 through 301.89-16. APHIS amended the Karnal Bunt regulations to provide for the payment of compensation to custom harvesters for losses they incurred due to the requirement that their equipment be cleaned and disinfected after four counties in northern Texas were declared regulated areas for Karnal Bunt during the 2000-2001 crop season.

Need and Use of the Information: APHIS will collect information using PPQ 540, Certificate of Federal/State Domestic Plant Quarantines. The certificate is used for domestic movement of treated articles relating to quarantines. The information collected is critical to the mission of preventing the infestation of Karnal Bunt into non-infested areas of the United States.

Description of Respondents: Farms; Business or other for-profit.

Number of Respondents: 40.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 8.

SUPPLEMENTARY INFORMATION:

Title: Virus-Serum-Toxin Act and Regulations.

OMB Number: 0579-0013.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture is responsible for ensuring that veterinary biological products are pure, safe, potent, and effective. This program is conducted under the Virus-Serum-Toxin Act (21 U.S.C. 151, *et seq.*) and the regulations in 9 CFR, chapter I, subchapter E. Veterinary biological products are defined as all viruses, serums, toxins (excluding substances that are selectively toxic to microorganisms, *e.g.*, antibiotics), or analogous products at any stage of production, shipment, distribution, or sale, which are intended for use in the treatment of animals and which act primarily through the direct stimulation, supplementation, enhancement, or modulation of the immune system or immune response. The term "biological products" includes, but is not limited to, vaccines, bacterins, allergens, antibodies, antitoxins, toxoids, immunostimulants, certain cytokines, antigenic or immunizing components of live organisms, and diagnostic components that are of natural or synthetic origin or that are derived from synthesizing or altering various substances or components of substances, such as microorganisms, genes or genetic sequences, carbohydrates, proteins, antigens, allergens, or antibodies.

To accomplish its mission, APHIS issues licenses to qualified establishments that produce biological products and issues permits to importers of such products. We also enforce requirements concerning production, packaging, labeling, and shipping of these products and set standards for the testing of these products.

Fulfilling this responsibility requires us to use certain information collection activities such as establishment license applications, product license applications, product import permit applications, product and test report forms, and field study summaries. This information helps us to ensure that biological products used in the United States are pure, safe, potent, and effective. If we did not collect this information, we would be unable to carry out this mission.
