SUPPLEMENTARY INFORMATION:

I. Discussion

The introduction of UF₆ into any separation building module (SBM) at the UUSA uranium enrichment facility is not permitted until the NRC completes an operational readiness and management measures verification review, to verify that management measures ensure compliance with the performance requirements of section 70.61 of title 10 of the *Code of Federal Regulations* (10 CFR) have been implemented, and confirms that the system, structures, and components in the SBM were constructed in accordance with the license and would be operated safely.

The NRC staff has conducted operational readiness reviews, management measures verification reviews, and prepared inspection reports documenting its findings in accordance with the requirements of the NRC's Inspection Manual. The authorization letters associated with the various reviews and reports are available for review as specified in Section II of this notice. The publication of this notice satisfies the requirements of 10 CFR 70.32(k), and Section 193(c) of the Atomic Energy Act of 1954, as amended.

SUPPLEMENTARY INFORMATION:

I. Discussion

On May 9, 2025, the President issued E.O. 14294, "Fighting Overcriminalization in Federal Regulations." Notice of this E.O. was published in the **Federal Register** on May 14, 2025 (90 FR 20363). Section 7 of E.O. 14294 provides that within 45 days of the order, and in consultation with the Attorney General, each agency should publish guidance in the **Federal Register** describing its plan to address criminally liable regulatory offenses.

Consistent with that requirement, the NRC advises the public that by May 9, 2026, the NRC in consultation with the Attorney General, will provide to the Director of the Office of Management and Budget a report containing: (1) a list of all criminal regulatory offenses¹ enforceable by the NRC or the Department of Justice (DOJ); and (2) for each such criminal regulatory offense, the range of potential criminal penalties for a violation and the applicable mens rea standard² for the criminal regulatory offense.

This notice also announces a general policy, subject to appropriate exceptions

¹ "Criminal regulatory offense" means a Federal regulation that is enforceable by a criminal penalty. E.O. 14294, sec. 3(b).

² "Mens rea" means the state of mind that by law must be proven to convict a particular defendant of a particular crime. E.O. 14294, sec. 3(c).

and to the extent consistent with law, that when the NRC is deciding whether to refer alleged violations of criminal regulatory offenses to DOJ, officers and employees of the NRC should consider, among other factors:

- the harm or risk of harm, pecuniary or otherwise, caused by the alleged offense;
- the potential gain to the putative defendant that could result from the offense;
- whether the putative defendant held specialized knowledge, expertise, or was licensed in an industry related to the rule or regulation at issue; and
- evidence, if any is available, of the putative defendant's general awareness of the unlawfulness of his conduct as well as his knowledge or lack thereof of the regulation at issue.

The NRC will implement this general policy in a manner consistent with the NRC's existing Memorandum of Understanding with DOJ regarding referral of matters from the NRC to DOJ (53 FR 50317). In addition, the NRC will implement the requirements of E.O. 14294 in a manner consistent with the requirements of E.O. 14300, "Ordering the Reform of the Nuclear Regulatory Commission" (90 FR 22587).

This general policy is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

Dated: June 17, 2025.

For the Nuclear Regulatory Commission.

Mirela Gavrilas,

Executive Director for Operations.
