

rebuilding plan, adjusts the Stock Annual Catch Limit, and considers commercial and recreational management measures consistent with the modified Stock Annual Catch Limit. These actions are proposed in response to the results from the 2011 Greater Amberjack Stock Assessment which determined the stock is both overfished (population is too low) and undergoing overfishing (rate of removals too high). To achieve the reductions in the Stock Annual Catch Limit the Council is looking at changes to the current recreational minimum size limit and fixed closed seasons. For the commercial sector the Council is looking at adding trip limits and potentially removing the fixed closed season.

Spiny Lobster Amendment 11

The Gulf Council is holding two public hearings on Amendment 11 in the Florida Keys. The purpose of Amendment 11 to the Spiny Lobster Fishery Management Plan is protect threatened and endangered species in a manner that complies with measures established in the 2009 biological opinion and meets the requirements of the Endangered Species Act. The Gulf of Mexico and South Atlantic Fishery Management Councils are considering the following two actions to achieve these goals: (1) Closing areas to either all spiny lobster fishing or the lobster trap fishery to protect threatened corals and (2) Requiring gear markings for spiny lobster trap lines to allow identification of trap lines entangling protected species.

The Public Hearings will begin at 6 p.m. and conclude at the end of public testimony or no later than 9 p.m. at the following locations:
