

processors; (2) list the characteristics of fishing vessels and/or dealer/processor operations; (3) exercise influence over compliance (e.g., withhold issuance pending collection of unpaid penalties); (4) maintain contact lists for the dissemination of important information to the industry; (5) register participants to be considered for limited entry; and (6) provide a universe for data collection samples. Identification of fishery participants, their gear types, vessels, and expected activity levels is an effective and necessary tool in the enforcement of fishery regulations.

This collection is being revised to introduce a new online permitting system (FishOnline) to allow individuals and organizations to apply and renew their fishing vessel permits, operator permits, dealer permits, Letter of Authorization (LOA), and gillnet certificates. Also, automatic VMS polling is also being removed from the list of information collections as this does not pose any burden on the vessel captain or crew.

This collection also includes the requirement for participants in certain fisheries to use onboard vessel monitoring systems (VMS) and to notify NMFS before fishing trips for the purpose of observer placement. Other permitting in this collection includes the written request to participate in any of the various exemption programs offered in the Greater Atlantic region.

Exemption programs may allow a vessel to fish in an area that is limited to vessels of a particular size, using a certain gear type, or fishing for a particular species. This collection also contains paperwork required for vessel owners to request gillnet and lobster trap tags through the Greater Atlantic region permit office.

Lastly, vessel owners that own multiple vessels, but would like to request communication from NMFS be consolidated into one mailing (and not separate mailings for each vessel), may request the single letter vessel owner option to improve efficiency of their business practice.
