**SUPPLEMENTARY INFORMATION:** The ROD provides final determinations and approvals by the FAA for federal actions needed to enhance aviation safety and protect current and future aviation uses

at Sitka Rocky Gutierrez Airport, Sitka, Alaska. Included within the ROD are descriptions of the six projects proposed by the Airport Sponsor (the Alaska Department of Transportation and Public Facilities) and the documented need for each project, alternatives to the proposed actions, environmental impacts associated with the actions and alternatives, and mitigation measures required to avoid or minimize environmental harm. The ROD also discloses the federal, state, and local actions needed prior to the implementation of each of the projects and provides findings, certifications, and determinations concerning resources of special concern. Conditions of approval that must be met by the Alaska Department of Transportation and Public Facilities prior to construction are also listed. The ROD identifies the FAA's preferred and environmentally preferred alternatives, as well as those alternatives selected by the FAA for implementation. Additionally, the ROD explains the authorization that must be granted by the Department of Interior's Bureau of Land Management to convey federal lands to the state of Alaska for aviation and airport uses.

The FAA's selected alternatives identified in the ROD are:

- Runway Safety Area Alternative 5: Declared Distances with 280-Foot Landmass Expansion on Runway End 29 and Additional Runway Pavement
- Parallel Taxiway Alternative 3: Partial Extension of the Parallel Taxiway to Charcoal Island
- Seaplane Pullout Alternative 2: Construction of Fixed Ramp Seaplane Pullout on Charcoal Island

The evaluation in the Final EIS indicates that none of the alternatives significantly restrict subsistence activities.

The notice of availability for the Final EIS was published by the Environmental Protection Agency on

May 22, 2009. The FAA issued its ROD on the Final EIS on September 28, 2009.
