Submission for OMB Review; Comment Request; Young Drivers Intervention Study

SUMMARY: Under the provisions of section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Institute of Child Health and Human Development (NICHD), the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below. This proposed information collection was previously published in the **Federal Register** on April 5, 2002, pages 16407-16408, and allowed 60-

days for public comment. No public comments were received. The purpose of this notice is to allow an additional 30 days for public comment. The National Institutes of Health may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

Proposed Collection: Title: Young Drivers Intervention Study, OMB No. 0925-0467. **Type of Information Collection Request:** Revision. **Need and Use of Information Collection:** This study will assess the effectiveness of a parent-based education program to increase parental restrictions on newly licensed teens' early driving and to decrease young driver risk. The primary objectives of the study are to determine if parents can be persuaded to increase restrictions on teens' driving under high-risk conditions (e.g., at night and with teen passengers) and to use a parent-teen driving agreement, and to determine if doing so decreases adolescent citations and crashes. The findings will provide valuable information concerning: (1) Whether parental actions to monitor and control the driving behavior of their teenage

children reduce the number of motor vehicle crashes and citations; (2) the effectiveness of the use of educational persuasive communications and a parent-teen driving agreement in promoting parental restrictions of adolescents' driving behavior; and (3) the effectiveness of this intervention in reducing motor vehicle crashes among teens. **Frequency of Response:** 4 or 5 times over two years (i.e., when teens get a learner's permit, when teens get a driver's license, and 3 months, 6 months, and 12 months postlicensure). **Affected Public:** Teenagers under age 16 years 9 months who get a learner's permit at any of the sites of the Connecticut Department of Motor Vehicles and one of their parents. **Type of Respondents:** Teenagers and Parents. The annual reporting burden is as follows: **Estimated Number of Respondents:** 9519; **Estimated Number of Responses per Respondents:** 1.6522; **Average Burden Hours Per Response:** .5; and **Estimated Total Annual Burden Hours Requested:** 7,864. The annualized cost to respondents is estimated at: \$78,640 (based on \$10 per hour). There are no Capital Costs to report. There are no Operating or Maintenance Costs to report.

Type of respondents	Estimated number of respondents	Estimated number of responses per respondent	Average burden hours per response	Estimated total annual burden hours requested
Teenagers and Parents	9519	1.6522	.50	7864

Request for Comments: Written comments and/or suggestions from the public and affected agencies are invited on one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Direct Comments to OMB: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated

public burden and associated response time, should be directed to the: Office of Management and Budget, Office of Regulatory Affairs, New Executive Office Building, Room 10235, Washington, DC 20503, Attention: Desk Office for NIH. To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact Dr. Bruce Simons-Morton, Chief, Prevention Research Branch, DESPR, NICHD, NIH, 6100 Executive Blvd., Rm 7B05, MSC 7510, Bethesda, MD 20892-7510; (301) 493-5674; email: mortonb@mail.nih.gov.

Comments Due Date: Comments regarding this information collection are best assured of having their full effect if received within 30-days of the date of this publication.

Dated: July 26, 2002.

Kathleen Wilburn,

Project Clearance Liaison, NICHD, National Institutes of Health.

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, Public Health Service, DHHS.

ACTION: Notice.

SUMMARY: The invention listed below is owned by an agency of the U.S. Government and is available for licensing in the U.S. in accordance with 35 U.S.C. 207 to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent

applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

ADDRESSES: Licensing information and copies of the U.S. patent applications listed below may be obtained by writing to the indicated licensing contact at the Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 20852-3804; telephone: 301/496-7057; fax: 301/402-0220. A signed Confidential Disclosure Agreement will be required to receive copies of the patent applications.

ABCA8 Nucleic Acids and Proteins, and Uses Thereof

Michael C. Dean *et al.* (NCI)

DHHS Reference No. E-030-00/0 filed 19 Oct 2001.

Licensing Contact: Catherine Joyce; 301/496-7735 ext. 258; e-mail: joycec@od.nih.gov.

This technology pertains to the identification of a novel gene in the ABC (ATP-binding cassette transporter) gene superfamily, the ABCA8 gene. The ABC proteins are involved in extra- and intracellular membrane transport of various substrates such as ions, amino acids, peptides, sugars, vitamins, or steroid hormones. At least 14 members of the ABC gene superfamily have been described as associated with human disease.

The ABCA8 gene is one of a group of several ABCA genes that is organized in a single large cluster on chromosome 17q24, in a head to tail fashion, and conserved in the mouse genome. The ABCA8 gene is believed to be involved in the reverse transport of cholesterol, as well as in the membrane transport of other lipophilic molecules such as inflammation mediating substances such as prostaglandins and prostacyclins.

The above-mentioned invention is available for licensing on an exclusive or non-exclusive basis.

Dated: July 25, 2002.

Jack Spiegel,

Director, Division of Technology, Development and Transfer, Office of Technology Transfer, National Institutes of Health.

National Institute of Diabetes and Digestive and Kidney Diseases; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Diabetes and Digestive and Kidney Diseases Special Emphasis Panel, Alternative Therapies for Benign Prostate Symptoms.

Date: August 18-19, 2002.

Time: 7:30 p.m. to 3 p.m.

Agenda: To review and evaluate grant applications.

Place: Marriott Suites, 6711 Democracy Blvd., Bethesda, MD 20814.

Contact Person: Ned Feder, MD, Scientific Review Administrator, Review Branch, DEA, NIDDK, Room 748, 6707 Democracy Boulevard, National Institutes of Health, Bethesda, MD 20892.

Name of Committee: National Institute of Diabetes and Digestive and Kidney Diseases Special Emphasis Panel, MTOPS Prostate Samples Analysis Consortium (MPSA).

Date: August 26-27, 2002.

Time: 7:30 p.m. to 2 p.m.

Agenda: To review and evaluate grant applications.

Place: Marriott Suites, 6711 Democracy Blvd., Bethesda, MD 20814.

Contact Person: Ned Feder, MD, Scientific Review Administrator, Review Branch, DEA, NIDDK, Room 748, 6707 Democracy Boulevard, National Institutes of Health, Bethesda, MD 20892.
