

summer tanager (*Piranga rubra cooperi*), yellow-breasted chat (*Icteria virens*), yellow warbler (*Dendroica petechia brewstri*), burrowing owl (*Athene cunicularia*), gray vireo (*Vireo vicinior*), Le Conte's thrasher (*Toxostoma lecontei*), crissal thrasher (*Toxostoma crissali*), California red-legged frog (*Rana aurora draytonii*), mountain yellow-legged frog (*Rana muscosa*), desert tortoise (*Gopherus agassizii*), Coachella Valley fringe-toed lizard (*Uma inornata*), flat-tailed horned lizard (*Phrynosoma mcalli*), Coachella Valley grasshopper (*Spaniacris deserticola*), Coachella giant sand-treader cricket (*Macrobaenetes valgum*), Coachella Valley Jerusalem cricket (*Stenopelmatus cahuilaensis*), Coachella Valley milk vetch (*Astragalus lentiginosus* var. *coachellae*), triple-ribbed milk vetch (*Astragalus tricarınatus*), and little San Bernardino Mountains gilia (*Linanthus maculatus*).

The Tribe intends for the HCP to serve four main purposes: (1) To set forth a program for protecting natural resources while managing economic development objectives for the Reservation; (2) to streamline compliance with the Act into a comprehensive Reservation-wide approach; and (3) to recognize the Tribe's traditional sovereign land and resource management policies and practices; and (4) to provide a feasible and practicable means for the Tribe to conserve the 24 species, and for the Service to meet the responsibilities of the Act under Secretarial Order 3206 and Executive Order 13175.

The proposed HCP would be a comprehensive plan that seeks to address the 24 covered species within a reserve system. Specifically, the proposed HCP would establish: (1) A Mountains and Canyons Conservation Area in which certain lands are proposed to be dedicated to the reserve system and general and species-specific conservation measures would be imposed on covered projects and/or implemented by the Tribe, and (2) a Valley Floor Conservation Area from which funding would generally be required for acquisition and management of additional reserve lands, certain lands would be dedicated to the reserve system, and additional conservation measures would be required to protect certain covered species. The proposed HCP includes avoidance and minimization measures, the establishment of the reserve system, and adaptive management and monitoring pursuant to the Act. The activities proposed to be covered by the HCP include construction and development activities and covered conservation and maintenance activities

(including operation and maintenance of public facilities and conservation management).

Public Comments

With the publication of this notice, the public is encouraged to submit written comments. Comments received shall be used to identify issues and draft alternatives. All comments received from individuals on Environmental Impact Statements become part of the official public record. Requests for such comments will be handled in accordance with the Freedom of Information Act, the Council on Environmental Quality's NEPA regulations [40 CFR 1506.6(f)], and other Service and Departmental policy and procedures.

Environmental Impact Statement

The Tribe and the Service have selected Helix Environmental Planning, Inc., to prepare the EIS. The document will be prepared in compliance with the National Environmental Policy Act (42 U.S.C. 4321, *et seq.*). Helix Environmental Planning, Inc., will prepare the EIS under the supervision of the Service, who is responsible for the scope and content of the document.

The EIS will identify potentially significant direct, indirect, and cumulative impacts on biological resources, land use, air quality, water quality, water resources, economics, and other environmental issues that could occur with the implementation of the Service's proposed actions and alternatives. The EIS will consider the proposed action, the issuance of a section 10(a)(1)(B) permit under the Act, and a reasonable range of alternatives. A detailed description of the impacts of the proposed action and each alternative will be included in the EIS. Several alternatives, including a No Action alternative will be considered and analyzed, representing varying levels of conservation, impacts, and permit area configurations. The No Action alternative means that the Service would not issue a section 10(a)(1)(B) permit.

Review of this project will be conducted in accordance with the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*), associated regulations (40 CFR parts 1500–1508) found at (<http://www.legal.gsa.gov>), other appropriate Federal laws, and Service policies and procedures for compliance with those regulations. This notice is being furnished in accordance with 40 CFR 1501.7 of the National Environmental Policy Act to obtain suggestions and information from other agencies and the

public on the scope of issues and alternatives to be addressed in the EIS. The primary purpose of the scoping process is to identify important issues raised by the public, related to the proposed action. Written comments from interested parties are welcome to ensure that the full range of issues related to the permit request is identified. All comments received, including names and addresses, will become part of the official administrative record and may be made available to the public.
