

47 CFR 76.971 requires cable operators to provide billing and collection services to leased access programmers unless they can demonstrate the existence of third party billing and collection services which, in terms of cost and accessibility, offer leased access programmers an alternative substantially equivalent to that offered to comparable non-leased access programmers.

47 CFR 76.975(b) allows any person aggrieved by the failure or refusal of a cable operator to make commercial channel capacity available or to charge rates for such capacity in accordance with the relevant provisions of the statute or the implementing regulations to file a petition for relief with the Commission. Persons alleging that a cable operator's leased access rate is unreasonable must receive a determination of the cable operator's maximum permitted rate from an independent accountant prior to filing a petition. If parties cannot agree on a mutually acceptable accountant within five business days of the programmer's request for a review, they must each select an independent accountant on the sixth business day. These two accountants will then have five business days to select a third independent accountant to perform the review. To account for their more limited resources, operators of systems entitled to small system relief have 14 business days to select an independent accountant when no agreement can be reached.

47 CFR 76.975(c) requires that petitioners attach a copy of the final accountant's report to their petition where the petition is based on allegations that a cable operator's leased access rates are unreasonable.

47 CFR 76.975(e) provides that the cable operator or other respondent will have 30 days from service of the petition to file an answer. If a leased access rate is disputed, the answer must show that the rate charged is not higher than the maximum permitted rate for such leased access, and must be supported by the

affidavit of a responsible company official. If, after an answer is submitted, the staff finds a prima facie violation of our rules, the staff may require a respondent to produce additional information, or specify other procedures necessary for resolution of the proceeding. Replies to answers must be filed within fifteen (15) days after submission of the answer.

The Commission has determined that there is some duplication in collections 3060–0568 and 3060–0569. Therefore, we are also consolidating collection 3060–0569 into 3060–0568. The Commission intends to discontinue collection 3060–0569 once the consolidation has been approved by OMB.

*OMB Control Number:* 3060–1104.

*Title:* Section 73.682(d), DTV Transmission and Program System and Information Protocol ("PSIP") Standards.

*Form Number:* N/A.

*Type of Review:* Extension of a currently approved collection.

*Respondents:* Business or other for-profit entities; not for-profit institutions.

*Number of Respondents and Responses:* 1,812 respondents and 1,812 responses.

*Estimated Hours per Response:* 0.50 hours.

*Frequency of Response:* Third party disclosure requirement; weekly reporting requirement.

*Total Annual Burden:* 47,112 hours.

*Total Annual Cost:* None.

*Obligation to Respond:* Required to obtain or retain benefits. The statutory authority for this collection is contained in Sections 309 and 337 of the Communications Act of 1934, as amended.

*Nature and Extent of Confidentiality:* Confidentiality is not required with this collection of information.

*Privacy Impact Assessment:* No impact(s).

*Needs and Uses:* Section 73.682(d) of the Commission's rules incorporates by reference the Advanced Television Systems Committee, Inc. ("ATSC") Program System and Information

Protocol ("PSIP") standard "A/65C." PSIP data is transmitted along with a TV broadcast station's digital signal and provides viewers (via their DTV receivers) with information about the station and what is being broadcast, such as program information. The Commission has recognized the utility that the ATSC PSIP standard offers for both broadcasters and consumers (or viewers) of digital television ("DTV").

ATSC PSIP standard A/65C requires broadcasters to provide detailed programming information when transmitting their broadcast signal. This standard enhances consumers' viewing experience by providing detailed information about digital channels and programs, such as how to find a program's closed captions, multiple streams and V-chip information. This standard requires broadcasters to populate the Event Information Tables ("EITs") (or program guide) with accurate information about each event (or program) and to update the EIT if more accurate information becomes available. The previous ATSC PSIP standard A/65-B did not require broadcasters to provide such detailed programming information but only general information.
