##### **I. Abstract**

The Quarterly Survey of Foreign Airline Operators' Revenues and Expenses in the United States (BE-9) is a survey that collects data from U.S. offices, agents, or other representatives of foreign airline operators that transport freight, express, and passengers to or from the United States and whose total covered revenues or total covered expenses were \$5 million or more in the previous year or are expected to be \$5 million or more

during the current year. The covered revenues are freight revenue on merchandise exported from, or imported into, the United States. Respondents are also asked to report: (1) Shipping weights on which freight revenues were earned; (2) the number of passengers transported to/from the United States; and (3) revenues associated with these passengers.
