Title: Superfund Site Evaluation and Hazard Ranking System (Renewal).

ICR Numbers: EPA ICR No. 1488.07, OMB Control No. 2050-0095.

ICR Status: This ICR is scheduled to expire on February 29, 2008. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA, 1980 and 1986) amends the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) to include criteria prioritizing

releases throughout the U.S. before undertaking remedial action at uncontrolled hazardous waste sites. The Hazard Ranking System (HRS) is a model that is used to evaluate the relative threats to human health and the environment posed by actual or potential releases of hazardous substances, pollutants, and contaminants. The HRS criteria take into account the population at risk, the hazard potential of the substances, as well as the potential for contamination of drinking water supplies, direct human contact, destruction of sensitive ecosystems, damage to natural resources affecting the human food chain, contamination of surface water used for recreation or potable water consumption, and contamination of ambient air.

EPA Regional offices work with States and Tribes to determine those sites for which the State or Tribe will conduct the Superfund site evaluation activities and the HRS scoring. Under this ICR, State or Tribal authorities will apply the HRS throughout a multi-phase site evaluation process. Evaluation results are used to identify which sites brought to the attention of the Superfund Program may warrant cleanup work and to help determine whether a site is eligible to be included on the National Priorities List (NPL). Only sites on the NPL are eligible for Superfund-financed remedial actions. EPA reimburses the States and Tribes 100 percent of their costs, except for record maintenance. Responses to this collection are required to obtain or retain a benefit.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 226.9 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: States (including U.S. Territories) and Tribes.

Estimated Number of Respondents: 60.

Frequency of Response: On occasion, averaging 11 responses per year per respondent.

Estimated Total Annual Hour Burden: 148,873.

Estimated Total Annual Cost: \$11,740,260, however all these costs are reimbursed by the Federal Government through cooperative agreements, resulting in no net cost to respondents for this ICR.

Changes in the Estimates: There is a decrease of 1,412 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease represents an adjustment to the estimates and is primarily due to a decline in the estimated number of assessment activities to be performed by respondents.

Disulfoton; Amendment to and Clarification of Order to Amend Registration to Terminate Uses

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's amendment to and clarification of the order for the termination of uses, voluntarily requested by the registrant and accepted by the Agency, of products containing the pesticide disulfoton, pursuant to section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This amendment and clarification follows an October 10, 2007 *Federal Register* Notice of Order to Amend Registrations to Terminate Uses (72 FR 57571) of disulfoton (Di-Syston 15G) for multiple uses. The October 10, 2007 order and the December 15, 2004, Notice of Receipt of Request (69 FR 75061) that preceded the order were unclear as to whether the use of Di-Syston 15G on Fraser fir Christmas trees was terminated, except for use in the State of North Carolina. In addition, the registrant had withdrawn its request to terminate use of Di-Syston 15G on Christmas trees outside of North Carolina during the time allowed and EPA issued the order without having processed that withdrawal. Accordingly, EPA hereby is amending the order to clarify that use of disulfoton on Fraser fir Christmas trees is allowed nationwide.

DATES: This amendment is effective February 6, 2008.
