An additional 1.21 acres of federal land would need to be included within the project boundary for tunnel construction. The proposed tunnel would not change the development's hydraulic or authorized installed capacity but would increase energy generation by about 56 gigawatt-hours annually due to efficiency improvements. The applicant also intends to incorporate into the license four fish protection measures that were developed by the applicant, agencies, and tribes which it has been voluntarily implementing since 1995. These measures are: (1) Limit downramping rates to < 3,000 cfs/hr from October 16 to December 31 each year; (2) begin salmon fry stranding protection January 1 instead of February 1; (3) change the chum salmon spawning default start date to November 1 rather than November 15; and (4) increase November/December chum salmon minimum incubation flows in Table C-3 of the Fisheries Settlement Agreement.
