(These telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1995 (PRA), Pub. L. 104-13, § 2, 109 Stat. 163 (1995) (codified as revised at 44 U.S.C. 3501-3520), and its implementing regulations, 5 CFR part 1320, require Federal agencies to provide 60-days notice to the public for comment on information collection activities before seeking approval by OMB. 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1), 1320.10(e)(1), 1320.12(a). Specifically, FRA invites interested respondents to comment on the following summary of proposed information collection activities regarding (i) whether the information collection activities are necessary for FRA to properly execute its functions, including whether the activities will have practical utility; (ii) the accuracy of FRA's estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to determine the estimates; (iii) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (iv) ways for FRA to minimize the burden of information collection activities on the public by automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submission of responses). See 44 U.S.C. 3506(c)(2)(A)(i)-(iv); 5 CFR 1320.8(d)(1)(i)-(iv). FRA believes that soliciting public comment will promote its efforts to reduce the administrative and paperwork burdens associated with the collection of information mandated by Federal regulations. In summary, FRA reasons that comments received will advance three objectives: (i) Reduce reporting burdens; (ii) ensure that it organizes information collection requirements in a "user friendly" format to improve the use of such information; and (iii) accurately assess the resources expended to retrieve and produce information requested. See 44 U.S.C. 3501.

Below is a brief summary of proposed new information collection activities that FRA will submit for clearance by OMB as required under the PRA:

Title: Work Schedules and Sleep Patterns of Railroad Dispatchers.

OMB Control Number: 2130-New.

Abstract: In a continuing effort to improve rail safety and to reduce the number of injuries and fatalities to rail workers, FRA and the railroad industry have focused on the issue of fatigue, primarily among train and engine crew personnel. Because railroading is an

around-the-clock, seven-days-a-week operation and because a wide array of workers are needed both to operate and to maintain the nation's railroads, other crafts—besides train and engine crews—can also be subject to fatigue. The non-operating crafts, including track maintenance, signal system maintenance and telecommunications and railroad dispatchers, fall into this second category. FRA is proposing a study which will focus on railroad dispatchers, one of the non-operating railroad crafts. FRA seeks to develop an understanding of the work schedule-related fatigue issues that affect railroad dispatchers. The proposed study has two primary purposes: (1) It aims to

document and characterize the work/rest schedules and sleep patterns of the railroad dispatchers; and (2) It intends to examine the relationship between these schedules and level of alertness/fatigue for the individuals who work these schedules. The intent is to report results in the aggregate, not by individual or railroad. Subjective ratings from participants of their alertness/sleepiness on both work and non-work days will be an integral part of this study. The data will be collected through the use of a daily diary or log completed by participants over a continuous two-week time period, as well as through a brief background questionnaire completed by each

participant. Analysis of the diary data will allow FRA to assess whether or not there are any work-related fatigue issues for railroad dispatchers. The proposed study will provide a defensible and definitive estimate of the work/rest cycle parameters and fatigue in dispatchers that will inform possible future FRA regulatory policy and action.
