II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized as follows.

1. *The title of the information collection:* Domestic Licensing of Source Material.

2. *OMB approval number:* 3150–0020.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* Not applicable.

5. *How often the collection is required or requested:* Reports required under 10 CFR part 40 are collected and evaluated on a continuing basis as events occur. There is a one-time submittal of information to receive a license. Renewal applications need to be resubmitted every 15 to 40 years. Information in previous applications may be referenced without being resubmitted. In addition, recordkeeping must be performed on an on-going basis.

6. *Who will be required or asked to respond:* Applicants for and holders of NRC licenses authorizing the receipt, possession, use, or transfer of radioactive source material.

7. *The estimated number of annual responses:* 1,516 (698 reporting responses + 813 recordkeeping responses + 5 third-party disclosure responses).

8. *The estimated number of annual respondents:* 812.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 18,469 (12,087 hours reporting + 6,367 hours recordkeeping + 15 hours third-party disclosure).

10. *Abstract:* The NRC regulations in 10 CFR part 40 establish procedures and criteria for the issuance of licenses to receive title to, receive, possess, use, transfer, or deliver source and byproduct material. The application, reporting, recordkeeping, and third-party notification requirements are necessary to permit the NRC to make a determination as to whether the possession, use, and transfer of source and byproduct material is in conformance with the Commission's regulations for protection of public health and safety.

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility? Please explain your answer.

2. Is the estimate of the burden of the information collection accurate? Please explain your answer.

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

II. Discussion

HDI is the holder of Renewed Facility Operating License No. DRP-16 for OCNGS. The license provides, among other things, that the facility is subject to all rules, regulations, and orders of the NRC now or hereafter in effect. The facility consists of a single unit boiling water reactor (BWR) that was utilized for the generation and transmission of electric power using nuclear fission as the source of production. The plant entered commercial operation on December 23, 1969. The reactor was refueled 26 times during operation spanning a period of almost a half-century and was the oldest U.S. BWR at the time of permanent shutdown and defueling in 2018. By letter dated August 1, 2024 (ADAMS Accession No. ML24214A037), as supplemented by letters dated March 27, 2025 (ADAMS

Accession No. ML25086A156), April 29, 2025 (ADAMS Package Accession No. ML25119A267) and May 13, 2025 (ADAMS Accession No. ML25133A131), HDI requested approval of a proposed amendment to the Renewed Facility Operating License DPR-16 for OCNGS to include LTP requirements.

III. Request for Comment and Public Meeting

According to paragraph 50.82(a)(9)(iii) of title 10 of the *Code of Federal Regulations* (10 CFR), after the licensee submits an LTP, the NRC must hold a public meeting near the site. In accordance with 10 CFR 50.82(a)(9)(iii) and 20.1405, upon the receipt of an LTP from a licensee, NRC must publish a notice in the **Federal Register** and solicit comments from affected parties. The purpose of the meeting is for the NRC staff to meet with stakeholders and discuss the NRC's review of the LTP and request public comments on the LTP. In addition, please see the related notice regarding the LTP proposed no significant hazards consideration determination and opportunity to request a hearing and petition to intervene (90 FR 30110, July 8, 2025). The meeting will be held on Wednesday, September 17, 2025, at the Lacey Township Municipal Building Court Room, 818 Lacey Road, Forked River, New Jersey 08731, from 6 p.m. until 9 p.m. ET. Please contact Amy M. Snyder at 301-415-6822 or by email at Amy.Snyder@nrc.gov no later than September 3, 2025, if accommodations or special equipment are needed for you to attend or to provide comments, so that the NRC staff can determine whether the request can be accommodated.

For additional information regarding this meeting see the NRC's Public Meeting Schedule website for information <https://www.nrc.gov/pmns/mtg>. The agenda will be posted no later than 10 days prior to the meeting.

Dated: August 12, 2025.
