Proposed Amendment of Class D Airspace and Revocation of Class E Airspace; Bogue, NC

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend Class D airspace by updating the geographic coordinates, and remove Class E airspace extending upward from 700 feet above the surface at Bogue Field Marine Corps Auxiliary Landing Field, (MCALF), Bogue, NC, at the request of the US Marine Corps. Class E airspace is no longer required, as there are no instrument approaches into Bogue Field MCALF. This action would also replace the outdated term Airport/Facility Directory with term Chart Supplement in the legal description of associated Class D airspace. This action would enhance the safety and management of controlled airspace within the National Airspace System.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This proposed rulemaking is promulgated under the authority described in Subtitle VII, part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend Class D airspace and remove Class E airspace extending upward from 700 feet above the surface at Bogue Field MCALF, Bogue, NC, due to the airspace no longer being necessary.

Comments Invited

Interested persons are invited to comment on this rule by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA–2020–0164 and Airspace Docket No. 20–ASO–3) and be submitted in triplicate to the DOT Docket Operations (see “ADDRESSES” section for address and phone number). Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11D, Airspace Designations and Reporting Points, dated August 8, 2019, and effective September 15, 2019. FAA Order 7400.11D is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11D lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA proposes an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 to amend Class D airspace by updating the geographic coordinates and remove Class E airspace extending upward from 700 feet above the surface at Bogue Field Marine Corps Auxiliary Landing Field, Bogue, NC as the airport has no instrument approaches. Therefore, the Class E airspace is no longer necessary. This action would enhance the safety and management of controlled airspace

within the national airspace system. This action would also replace the outdated term Airport/Facility Directory with the term Chart Supplement in the legal description of associated Class D airspace.

Class D and E airspace designations are published in Paragraphs 5000 and 6005, respectively, of FAA Order 7400.11D, dated August 8, 2019, and effective September 15, 2019, which is incorporated by reference in 14 CFR 71.1.

The Class E airspace designation listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal would be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.
