SUPPLEMENTARY INFORMATION:

I. Abstract

The U.S. Government is preparing to remove the export licensing requirement for certain thermal imaging cameras to certain destinations. A new biannual reporting requirement will be imposed to allow the USG to verify that the cameras are continuing to be sold to appropriate end-users and that the relaxation in controls is not jeopardizing U.S. national security or foreign policy interests.

In June of 2007, the Bureau of Industry and Security (BIS) received emergency preapproval for this collection of information. However, the final version of the associated rule "Revisions to License Requirements and License Exception Eligibility for Certain Thermal Imaging Cameras and Focal Plane Arrays," has not yet been published. BIS is seeking renewal of this collection authority so that publication of the final rule will not be further delayed by a lapse in the collection authority.

II. Method of Collection

The biannual reports are paper format and will be accepted via e-mail, facsimile or mail delivery.
