

social behavior change system (Gender Action Learning System) will reduce barriers to markets for rural communities, especially women and youth. In addition, this project will include technical assistance and capacity building to ensure the sustainability of these investments through better road asset management.

(2) The Asset Finance Project (\$45,000,000) aims to increase access to finance for investments in electricity, irrigation, logistics and processing (EILP) equipment and infrastructure for both men and women-owned agricultural small and medium enterprises and project developers across agriculture value chains. These investments will contribute to Zambia's national development plan by increasing the adoption of irrigation, agro-processing and value addition, grain and produce storage facilities, and investments in energy sources. The project addresses the affordability of financing for EILP equipment through performance-based grants to financial service providers and equipment providers to incentivize increased lending and financing to the agriculture sector for EILP equipment and catalyzing impact investment for agri-enterprises. The project will also include capacity building and technical assistance to public and private project developers to increase the number of EILP infrastructure investments in the agriculture value chain that reach financial close.

(3) The Agriculture Policy Reform and Institutional Strengthening Project (\$25,000,000) is designed to improve institutional capacity to facilitate private sector production and trade in grains. The Compact, and its associated reforms, will contribute to creating a private sector-driven agriculture and agro-processing market and support broader efforts by the GRZ and other donors to address key policy challenges constraining private sector production and trade in grain markets. To this end, the project will strengthen the Ministry of Agriculture's capacity to develop and implement reforms as well as improve the Food Reserve Agency's capacity to carry out its core functions efficiently, including managing the strategic grain reserves, encouraging private sector involvement in grain trading, making timely payments for purchases, and providing appropriate price stabilization. It will also build the Food Reserve Agency's capacity for assessing, monitoring, and analyzing the impact of its policies and practices on food security, poverty, and vulnerability, and strengthen its vulnerability response and mitigation functions. Finally, this

project aims to build transparency and trust among market players by establishing an independent market observatory that collects timely and accurate data on stocks and prices and conducts relevant market analyses for the benefit of public sector policy makers and private sector economic actors, and by supporting a commodity exchange.

(4) The American Catalyst Facility for Development (ACFD) Project (\$8,000,000) is designed to facilitate the U.S. Development Finance Corporation's (USDFC) investments in Zambia in the sectors identified as constraints to Zambia's growth by MCC. DFC's current transaction pipeline in Zambia, for example, includes several projects that are not viable without additional de-risking. ACFD grant funding will enable DFC-led projects like these, that would not otherwise be viable, to reach financial close.

Program Budget

The table below presents the overall budget for the program of \$491,750,000, which includes MCC funding under the Compact of up to \$458,000,000 and a GRZ contribution of at least \$33,750,000 (required minimum of 7.5 percent, excluding ACFD).
