Sea Turtle Conservation; Shrimp Trawling Requirements

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; request for comments.

SUMMARY: NMFS issues this temporary action to allow the use of limited tow times by shrimp trawlers as an alternative to the use of Turtle Excluder Devices (TEDs) in inshore waters of Galveston Bay, Texas, north of the Galveston jetties, east of the Galveston Island Interstate-45 Causeway, west of the "Shellfish Line" in East Bay (the line running from the entrance to Robinson Bayou to the tide gauge at Marsh Point), and, in Upper Galveston Bay, south of the overhead power lines crossing from near Evergreen Point to near Barbour's Cut, and, in Trinity Bay, south of the line running from the entrance of Double Bayou to Umbrella Point. Dense concentrations of marine organisms have been documented in this area and are clogging TEDs, rendering the TEDs ineffective in expelling sea turtles from the shrimp nets as well as negatively impacting fishermen's catches.

DATES: This action is effective from August 23, 2000 through 11:59 p.m. local time on September 22, 2000. Comments on this action are requested, and must be received by September 22, 2000.

ADDRESSES: Comments on this action should be addressed to the Chief, Endangered Species Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Silver Spring, MD 20910.

SUPPLEMENTARY INFORMATION:

Background

All sea turtles that occur in U.S. waters are listed as either endangered or threatened under the Endangered Species Act of 1973 (ESA). The Kemp's ridley (*Lepidochelys kempii*), leatherback (*Dermochelys coriacea*), and hawksbill (*Eretmochelys imbricata*) are listed as endangered. Loggerhead (*Caretta caretta*) and green (*Chelonia mydas*) turtles are listed as threatened, except for populations of green turtles in Florida and on the Pacific coast of Mexico, which are listed as endangered.

The incidental take of these species as a result of shrimp trawling activities has been documented in the Gulf of Mexico and along the Atlantic. Under the ESA and its implementing regulations, taking sea turtles is prohibited, with exceptions identified in 50 CFR 223.206. Existing sea turtle conservation
