Kram Hydro 4, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On February 15, 2024, Kram Hydro 4, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of a hydropower project proposed to be located at the U.S. Army Corps of Engineers' (Corps) Saylorville Locks and Dam near the City of Des Moines, Polk County, Iowa. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Saylorville Hydroelectric Project would consist of the following: (1) a proposed 90-foot-long, 30-foot-wide intake channel near the west bank of the existing Corps' dam; (2) a proposed 2,100-foot-long and 20-foot-diameter steel penstock extending from the intake to a proposed powerhouse; (3) a proposed 70-foot-long, 120-foot-wide reinforced concrete powerhouse, located downstream of the existing Corps' dam, containing two Kaplan pit turbine-generators with a total capacity of 10.0 megawatts; (4) an existing tailrace channel used to convey flows back to the Des Moines River downstream of the Corps dam's discharge channel; (5) a proposed 13.8 kilovolt-ampere substation located adjacent to the proposed powerhouse; and (6) a proposed 13.8 kilovolt, 7,000-foot-long 3-phase overhead transmission line connecting the substation to the grid. The proposed project would have an estimated annual generation of 52,000 megawatt-hours.

l. *Description of Request*: The purpose of the project is to restore the Lower Feeley Lake Dam (Carr Lake) Crest to its original design elevation and associated upstream toe along with enhanced protection to the upstream slope. A variance in the minimum flows required by Article 39 is necessary to facilitate the work. Approving the variance would allow the licensee to reduce flows released from the Lower Feeley Dam from the required flow of 0.5 cubic-feet-per-second (cfs) target to a 0.4 cfs target and reduce the allowable minimum flow from 0.2 cfs to 0.1 cfs. The described reduction in flows would be permitted from the onset of variance approval by the Commission, if approved, until November 30, 2024.
