

information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Focus Group Protocols and Consent Collection for Pre-Purchase Homeownership Counseling Demonstration and Impact Evaluation; Second Round.

OMB Approval Number: 2528-0293.

Type of Request: Revision.

Description of the need for the information and proposed use: The Department of Housing and Urban Development (HUD) is conducting an important national study of the effectiveness of pre-purchase homeownership counseling services. This information collection covers two updates to the initial data collection: (a) Replacement of telephone interviews with focus groups to collect qualitative data and (b) changes to the approach used to collect consent from coborrowers of study participants. The

information collected through the focus groups will be used to support the implementation analysis and to collect qualitative information about study participants' experiences with pre-purchase homeownership counseling services. The collection of consent from study participants' coborrowers is necessary to allow the study to collect data related to the characteristics and performance of study participants' mortgage loans.

Respondents (i.e. affected public): A total of up to 144 study participants will participate in 12 focus groups of 8-12 participants each. Each focus group will take approximately 120 minutes. Prior to the focus groups, the study team will contact eligible study participants in three cities to request participation in a focus group and confirm eligibility information. The recruitment calls are estimated to take approximately 5 minutes per person. The study's

enrollment projections suggest that the three largest study sites will include approximately 720 eligible study participants, although recruitment will end sooner if the available focus group slots are filled.

The collection of coborrower consent involves including the coborrower consent form in the study's regular tracking letters, along with a request for the coborrower to review, sign, and return the written consent form. The study estimates that approximately 1800 study participants will have coborrowers. The coborrowers' review and return of the coborrower consent form is estimated to require approximately 5 minutes per coborrower.

The focus group recruitment call, focus group, and coborrower will be completed once by each applicable respondent during the entire length of the study.

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hours per response (minutes)	Annual burden hours	Hourly cost per response	Annual cost
Focus group recruitment calls	720	1	1	5	60	\$25	\$1,500
Focus groups	144	1	1	120	288	25	7,200
